

Industrial Platform & Product Assessment

Is your platform ready to scale?

Make a scale, strengthen or rethink decision using evidence from the product, architecture and operating model.

For industrial platform owners and product teams considering rollout or commercialisation.

CLARIFY THE AMBITION

Users and use cases
Current platform
Intended rollout or market

**ASSESS READINESS**

Architecture and data
Support and ownership
Product and economics

**CHOOSE THE ROUTE**

Scale or strengthen
Partner or rethink
A staged roadmap

Test the move from a useful local solution to a repeatable platform or service.

What you take away

- | | | |
|----|-------------------------------|--|
| 01 | Readiness assessment | An evidence-based view of product, technology and operating maturity. |
| 02 | Options and trade-offs | Strengthen, extend, partner or rethink options against agreed criteria. |
| 03 | Development roadmap | Priorities, dependencies, support needs and staged investment decisions. |

Why AGILA

AGILA examines product ambition, industrial constraints and enterprise architecture as one connected system.

An independent assessment and development roadmap. Market assumptions, evidence gaps and business-case estimates remain explicit.

Separate what must change now from capabilities that only become necessary at a later scale.

Test your next scale decision.

Bring the platform, intended users and the next rollout or market ambition.
