

Practical AI Training & Adoption

Can your team use AI well?

Build practical habits around your team's work, with useful exercises and clear expectations for reviewing AI output.

For managers and professional teams building practical, repeatable AI working habits.

START WITH REAL WORK

Roles and recurring tasks
Current skills
Approved examples

**PRACTISE TOGETHER**

Context and instructions
Evidence and checking
Refinement and judgement

**BUILD WORKING HABITS**

Reusable toolkit
Internal champions
Adoption and feedback

Learn by doing the work, inspecting the result and improving the next attempt.

What you take away

- | | | |
|----|-----------------------------------|---|
| 01 | Tailored workshop material | Role-relevant examples, exercises and practical guidance. |
| 02 | Reusable working toolkit | Instructions, review checklists and examples the team can adapt. |
| 03 | Adoption action plan | Priority uses, internal champions and a plan for continued practice and feedback. |

Why AGILA

AGILA connects hands-on AI practice with the processes, data and review habits needed to use it in real work.

Role-relevant workshops and adoption support. Exercises use approved, anonymised or synthetic material.

Connect the learning to priority tasks and a plan for continued practice. A workflow pilot can follow as a separate step.

Bring the tasks your team repeats.

We will identify useful exercises and the skills to build first.
