

2501 AI

LOCUS SOLUS LABS

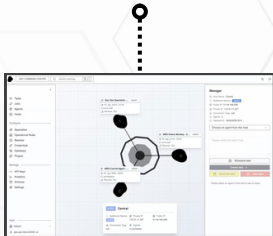

Enterprise-grade AIOps Agents
for IT, Cloud, SysOps, SRE and more.

2501.AI offers enterprise-grade AIOps Agents designed for IT, Cloud, SysOps, SRE, and more. These agents address the reliance on manual processes in corporate IT/Cloud infrastructures, particularly for Level-1 and Level-2 tasks. Traditional methods are costly, slow, and lack quality, but with Agentic AI, modernization is now possible.

Key Problems Addressed

- High HR efforts for IT infrastructure rotation and acquisition.
- Incompatibility of offshoring with sovereignty.
- Issues with competitiveness.
- Skilled engineers burdened with trivial Level-1 and Level-2 tasks.

Solution: 2501 Managed Services 3.0

- We revolutionizes IT Managed Services by deploying AI Agents that autonomously resolve incidents and complete maintenance tasks.
- This solution forecasts resolving 40-60% of Level-1 and Level-2 tickets within 24 months, aiming for "Zero Touch" operations where AI manages itself.

Deployment and Operation

- 2501 is a ready-to-deploy app offering ROI from Day-1 without data training.
- AI Agents are implemented directly onto infrastructure, monitoring tasks and managing interventions without end resource compromise.
- The solution supports SaaS or On-Premise installations, including air-gapped configurations for security needs.

Security and Flexibility

Compatible with multiple LLMs, providing enterprise-grade flexibility.
