

Enterprise Document Control with the Best of M365

Your teams work in Microsoft 365, but SharePoint alone can't enforce document lifecycles, approval workflows, or audit trails at enterprise scale. AODOcs closes that gap by delivering governance while keeping content in your tenant with the same security, AI, and collaboration tools.

Your M365 investment amplified

Copilot, Purview, and Office work on your governed content by default. No extra configuration.

Enterprise control, familiar tools

Workflows, metadata, and audit trails inside Word, Excel, and Teams. No context switching.

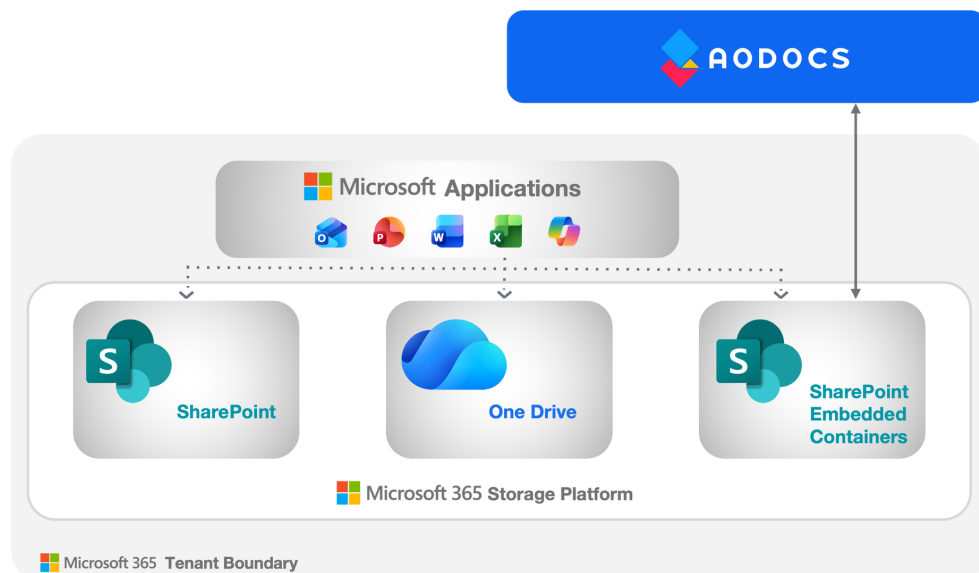

AI-ready content, from day one

Copilot queries governed, classified documents natively, within M365's security boundaries

SharePoint Embedded Architecture

SharePoint handles collaboration; AODOcs adds enforced lifecycle states, structured approvals, document numbering, and cross-site governance policies.

Manage critical documents without giving up the Microsoft experience

Common use cases

Document Control

Keep teams on the right document version with strict version control and access management.

Ex.: maintenance procedures, knowledge base, SOPs, etc.

Business Processes

Automate document-driven workflows across core business operations.

Ex.: insurance claims, supplier onboarding, contract approvals, etc.

Regulatory Compliance

Meet regulatory requirements with full traceability, audit trails, and document lifecycle control.

Ex.: ISO 9001, IATF 16949, KYC, document retention policies.

What you get with AODOCS + Microsoft 365

SharePoint Embedded

Same storage infrastructure as SharePoint and OneDrive. But dedicated SPE containers (isolated from SPO quota)

AODocs Document Control

Rich metadata, advanced workflows and version control, full traceability, templating, naming conventions and more

Copilot & Compliance

Files are searchable by Copilot within M365's security and governance boundaries

About AODocs

AODocs is a leading AI-enabled enterprise document management system used by global organizations including Google, Airbus, Equifax, Veolia, Colgate-Palmolive, and Whirlpool. Founded in 2012, AODocs helps enterprises modernize and secure their business-critical documents while replacing aging legacy systems. The platform combines cloud-native architecture, advanced AI capabilities, and configurable workflows.
