

Cut claims processing costs Catch more fraud

AODOCS reads and cross-checks every document in a claim file, flagging inconsistencies and potential fraud before you pay. Your team reviews only the cases that need a human.

Document Control

All policy and claim files in one governed repository, traceable and built to scale.

Process Automation

AI splits, classifies, and checks each claim file, while your teams keep the decision.

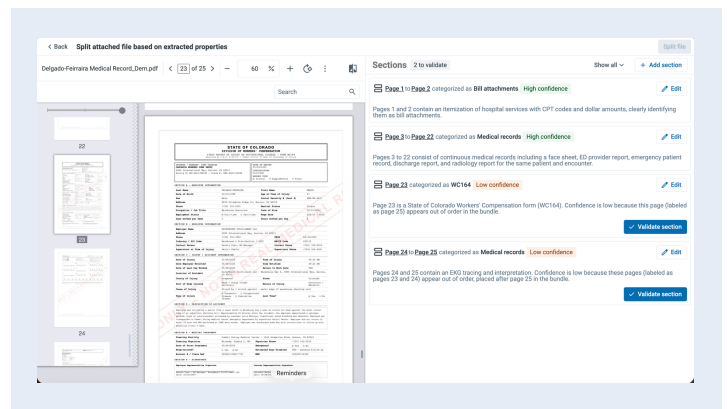

Knowledge Management

Instant, sourced answers for underwriters and adjusters, from approved documents only.

AI-Native Document Platform for Insurance

- Document fraud detection that flags altered and inconsistent files
- Claim files analyzed and summarized by AI, decisions made by your teams
- Open APIs to feed claims, policy, and billing platforms

Reliable AI, at insurance scale

Cut the manual work on every claim file

AODocs reads an entire claim file, extracts the structured data that matters, flags inconsistencies and potential fraud, and delivers a review-ready output to your team. Complex cases resolved faster, with every decision traceable to its source.

One platform for all your insurance use cases

Risk Analysis

Give underwriters a complete, reconciled view before they price a risk. AI extracts application data and flags gaps before the policy is bound.

Fraud Detection

AI cross-checks documents within a claim, flagging altered files and inconsistent declarations. Investigators focus only on the cases that warrant it.

Records Retention

AODocs archives every document insurers send customers, from policies to benefit statements. Retention policies apply automatically, at scale.
