

North: The AI platform where work gets done

North is a vertically integrated, all-in-one, secure AI workspace that empowers companies to always stay on the cutting edge of the most important technology in the world.

The platform enables users to accelerate impact and outcomes. It enables seamless human-agent collaboration, automation of routine tasks, and the transformation of fragmented data into actionable insights.

Trusted by industry leaders

ORACLE

A vertically integrated agent system

Search and discovery

With our advanced retrieval engine, North surfaces verifiable insights that are grounded in your internal data.

Performance LLMs

North is optimized to work with Cohere's Command family of foundational models, the most efficient models of their class.

Agent governance

Centralized control for AI agents, ensuring compliance, audit-ability, and alignment with organizational policies and security standards.

Private. Secure. An AI solution within your control.

Network isolated

Zero-trust architecture with isolated environments, safeguarding sensitive data and effectively mitigating external threats.

Deployable anywhere

Flexible deployment via cloud, on premises, or VPC, North can be interconnected for unified management across environments.

Customizable

Tailor the system to your needs with internal tools, utilize your own generative models, and brand the interface as you choose.
