PREMI3NS

S3NS Trusted Cloud

The first European hyperscaler

PREMI3NS delivers the power, innovation, and quality of service of Google Cloud within a trusted, secure environment, protected from extraterritorial laws such as the Cloud Act, as attested by its SecNumCloud certification.

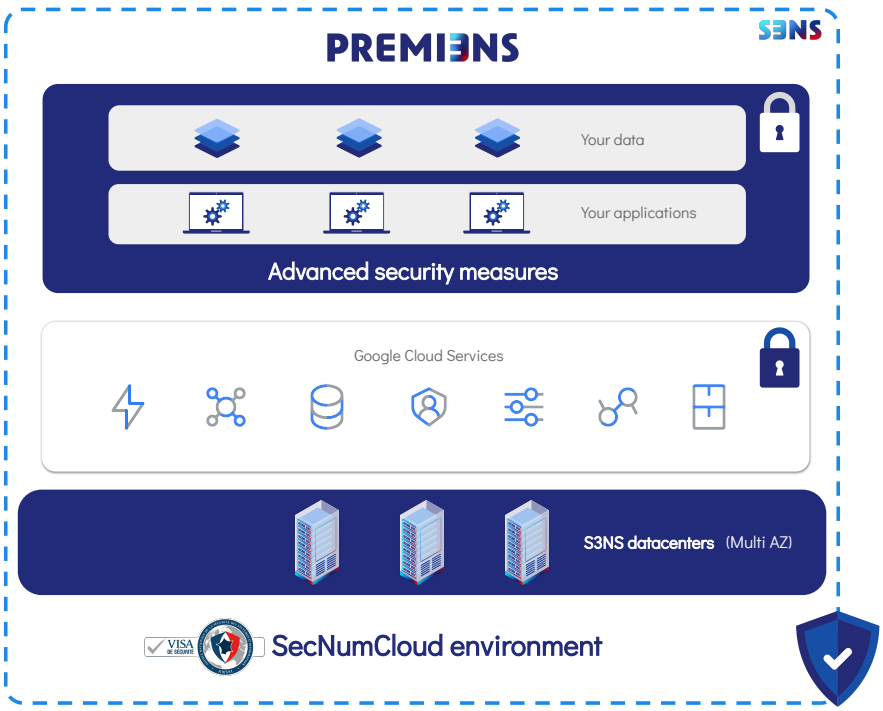

Client data
hosted in independent datacenters in France, operated by S3NS teams, with access restricted exclusively to S3NS personnel.

The SecNumCloud 3.2 certification
is the highest security standard in France. It is the best protection against extraterritorial laws.

Our service catalog
engineered for versatility and performance, supporting a wide variety of use cases.

A highly secure cloud platform

S3NS operates its datacenters in France, with operational and support teams based in France, composed of European citizens. They are certified by Google Cloud, and autonomous in operating the services.

Encryption of your data

Security policy automatically enforced

Tenants isolation

Audit and code checks by S3NS

Breadth and innovation of Google Cloud services

Data hosted in France , in S3NS datacenters

S3NS: the result of a unique partnership

> *Our goal is to empower businesses and institutions to transform confidently, delivering cutting-edge technology and ensuring inherent control over data, operations, and infrastructure.*

Cyprien Falque
CEO - S3NS

The best of two industry leaders

A company under French law

Subsidiary of the Thales Group, fully controlled by Thales

Technological ambitions

Towards a trusted equivalent of the Google Cloud platform

Service interoperability

Integrates seamlessly with existing tools and processes

Cutting-edge performance

For massive, critical or complex workloads

> *Our new Information System will have the capacity to support up to 6 million users, offering high-performance protection. It is powered by S3NS, a major French player that delivers high-value-added IT services while ensuring security and sovereignty.*

Arnaud Méjean
Director of Information Systems at MGEN and Managing Director of MGEN Technologies
