

Banks move fast when their documents do

AODOCS gives every banking team instant access to the right information, and every auditor the traceability they need. Accurate, approved, always current.

Knowledge Management

A validated, always-current knowledge base your bankers can rely on. Instant, accurate answers from approved sources only.

AI Automation

Incoming documents analyzed before they reach a human reviewer. Inconsistencies flagged; your team reviews only what needs a human eye.

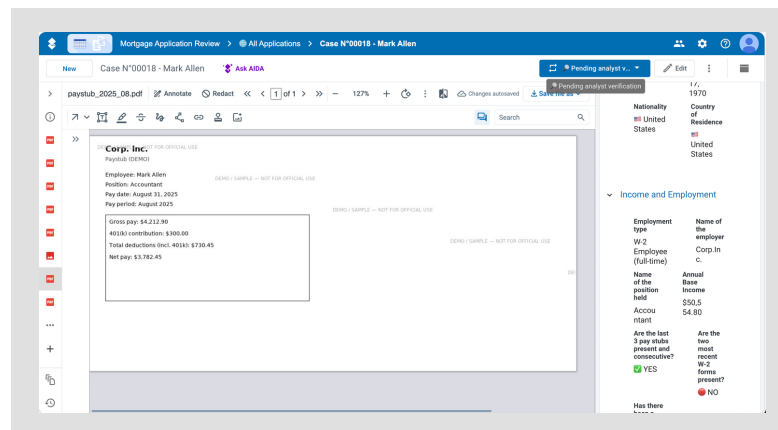

Secure Platform

SOC 2 certified, DORA-ready, and deployable on your bank's private cloud. Full control over data, infrastructure and LLM.

AI-Native Document Platform for Banking

- KYC workflows with automated sanctions and background screening
- Contracts and loan applications turned into structured data
- Everything auditable for security and compliance
- Sovereign cloud deployment, bring-your-own-LLM

Built for **the speed** modern banking demands

One platform for all your banking use cases

KYC & Client Onboarding

Securely collect and process onboarding files. AI analyzes documents, flags inconsistencies, and retrieves missing information automatically to cut onboarding time.

Risk & Credit Analysis

AI summarizes loan applications, flags inconsistencies across financial statements, and cross-references customer data with authoritative public records.

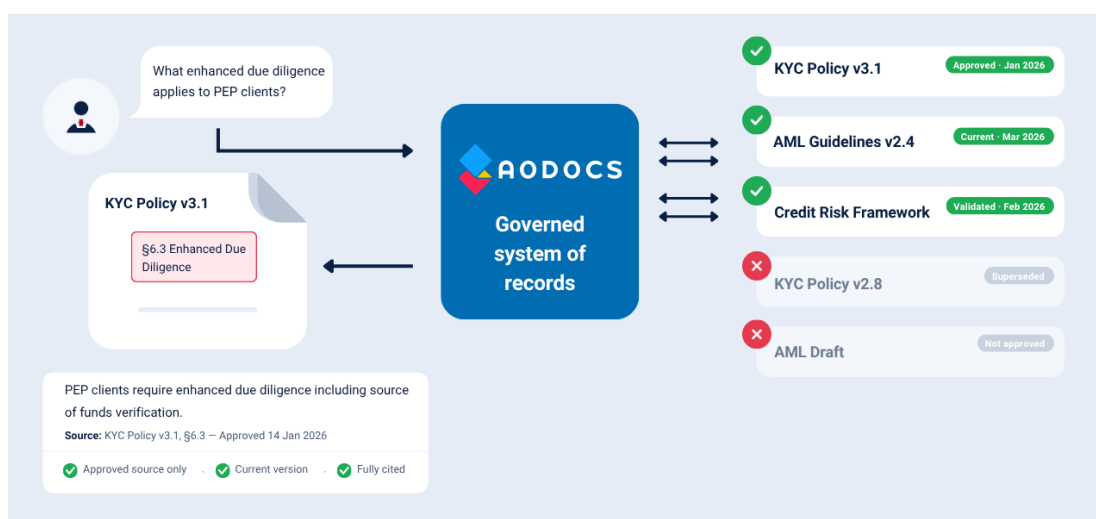

Legal & Contract Management

Automate metadata extraction from contracts. AI identifies critical clauses and evaluates risk exposure instantly.

Every answer, grounded in your approved documents

AODocs searches only the documents that have been approved, versioned, and validated, automatically excluding drafts, superseded versions, and unauthorized content. Every answer is grounded in a single, governed system of records.
