SOLUTION GUIDE

Actian Data Intelligence Platform

The Foundation for Enterprise AI

Today, businesses across the globe are shifting from traditional operations to a model that puts AI at the center of every decision. Successful AI-driven companies need the agility to innovate at speed, built upon a foundation of trusted, high-quality, and fully governed data. But companies cannot build these AI-powered experiences with legacy platforms and siloed tools that were built for a pre-AI world, leaving data disconnected from its essential business context. The Actian Data Intelligence Platform is purpose-built to create this governed, AI-ready data foundation, empowering companies to transform their complex data landscape into a unified, trusted resource for every user and every AI initiative.

25 of the Fortune 100 companies Rely on Actian

autostrade per l'Italia

"In our opinion, only the business functions can truly transform the company into a data-driven company. The Actian Data Intelligence Platform is the tool they need – efficient and usable – so that they are fully aware of their available data.It builds the bridge between business and data at Autostrade"

Functional data catalog in 6 months, 90% automated

- Ruben Marco Ganzaroli, Chief Data Officer

ACC AUTOMOTIVE CELLS Co

"The Actian Data Intelligence Platform has delivered a framework for our new governance program. While we are early in our project, we already see benefits from identifying clear data ownership, a strengthened understanding of our data, and a common language for everyone accessing data at ACC"

Onboarded 500+ users. On track to have 50% company usage.

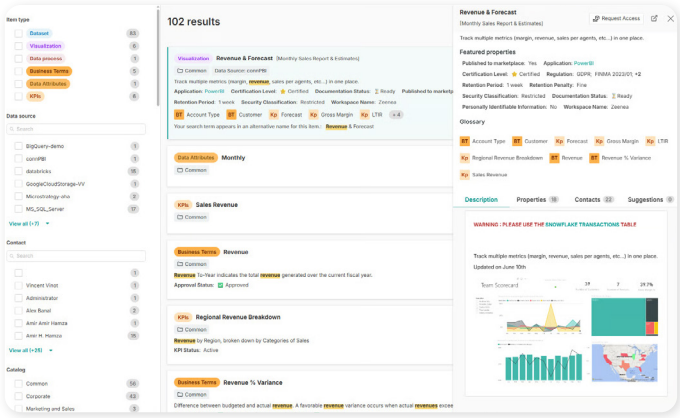

- Dr. Vincent Dekkar, Head - Data Governance

GROUPE BPCE

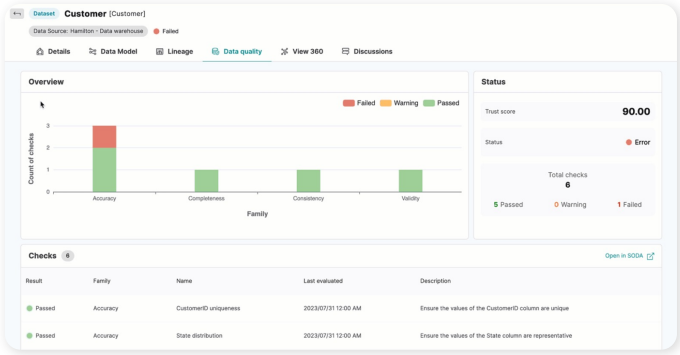

"Unlike Collibra, we were impressed by Actian's ability to connect instantly to our data sources without needing to rely on third-party tools. When comparing the TCO of both solutions - including subscription and implementation costs – Actian Data Intelligence Platform proved to be a much more cost-effective option"

80,000 glossary definitions and 32,000 documented datasets

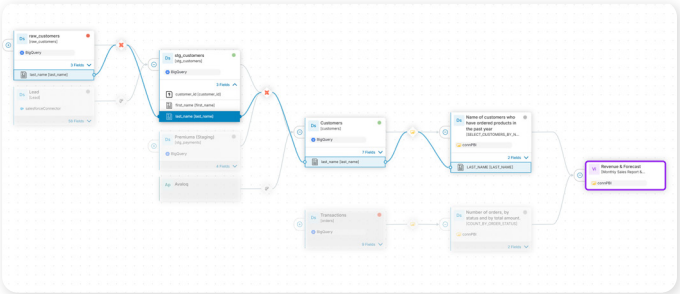

- Michel Lunetta, Data Catalog PM

Unified Data Catalog and Marketplace

Data Quality Indicators

Data Lineage

AI-Ready Data Foundation

- **Federated knowledge graph**
  Build a scalable AI foundation with enhanced data relationship visualization and superior search results. Power your GenAI with high-quality business context from a graph-based business glossary.
- **Actian MCP Server**
  Transform your data catalog from a passive repository into an active component of your Agentic AI strategy, enabling natural language data discovery directly within AI assistants.
- **Data Quality and Observability**
  Increase trust in data products and enhance the reliability of AI/ML models with comprehensive, no-sampling data quality monitoring.

Self-Service Analytics Empowerment

- **Dual User Interface**
  Empower every technical and business persona with a dedicated interface, driving higher user adoption rates with a low/no learning curve.
- **Unified Data Catalog and Marketplace**
  Enhance the user experience for data consumers with a single platform that requires no technical integration between the catalog and marketplace.
- **Ready-to-Use Data Products and Contracts**
  Accelerate data democratization and foster a true data product culture with native support for Open Data Product Standard (ODPS) and Open Data Contract Standard (ODCS) to future-proof your data architecture.

Regulatory Compliance Excellence

- **Smart Lineage**
  Enhance compliance and governance and improve root cause and impact analysis with always up-to-date, graph-based lineage visualization.
- **Metadata Harvesting Automation**
  Gain comprehensive visibility of your data landscape and reduce manual documentation efforts with automated, always up-to-date metadata.
- **Data Access Governance**
  Scale and automate data access requests by embedding purpose-based use cases directly into a streamlined approval workflow, ensuring all access is auditable and accelerating time-to-insight.
