All [your teams] will use Huwise

Huwise enables all of your teams to take ownership of data, enhancing their performance and operational efficiency, while driving innovation. Data and IT leaders and business departments all benefit from Huwise: whether it's steering your data & AI strategy, making better business decisions, maximizing the value of the organization's data assets, or optimizing ROI on existing data tools.

- ✓ Access and reuse of data products by business teams
- ✓ Management and governance of data products
- ✓ Analytical use cases and optimized AI-ready data
- ✓ Enhancement and monetization of data assets
- ✓ Secure sharing of data and information outside the organization

"Less time wrestling data, more time using it.

Our overall experience with Huwise has been excellent. The platform has enabled us to transform how we publish and share data, making it more accessible to a wide range of audiences, from policymakers to citizens. The combination of intuitive design, strong functionality, and responsive support has made it a reliable cornerstone of our data sharing approach."

Data and Analytics in Government industry

Innovative [features]

Built on 14+ years of experience in enabling data exploration for all

[1] Access to the data, not just the metadata

[2] A unique, highly customizable, self-service experience

[3] Ready-to-use data products, for human and AI

Native connectors and APIs to link all your data sources and data management solutions (data lakes, data warehouses, data catalogs, and BI tools)

Our MCP server to connect **your AI agents and enterprise applications**, making your data instantly usable and accessible across all your business channels

An intuitive, user-friendly data catalog, designed to ensure rapid adoption and ongoing use by non-technical users

An AI-powered search engine that enhances data discoverability and reuse

Multiple processors and a Data Hub with nearly 50,000 public datasets to help you prepare and enrich your data

A configurable conversion funnel to measure user engagement at every stage of their journey

A data lineage tool to assess the ROI of your data projects

No-code tools to create interactive visualizations and dashboards

Multiple sharing options for your data: pages, datasets, applications, APIs, and downloads in a range of formats

Streamlined access workflows to control who can find, preview, or consume each data product

Flexible cloud hosting, with sovereignty and regulatory compliance options

"Data is central to creating effective business strategies, technology innovations, and well-informed decision-making in organizations and across society. The rapidly evolving data market requires organizations to adapt to better manage their data products and generate ROI. Data product marketplace solutions make it easier to securely share data, as well as ensuring it can be seamlessly discovered and consumed by everyone, strengthening collaboration and trust."
