

Proactive IP Management System

DIAMS Infinity is a cloud-ready Intellectual Property (IP) management platform designed for teams that need verified records, structured workflows and reporting that holds up under executive scrutiny.

Built from the ground up to integrate artificial intelligence (AI), accuracy is maintained as part of the system's architecture rather than dependent on periodic manual review.

Connected to patent offices globally

Feature

Live patent office synchronization to keep your data accurate and up to date.

Impact

Portfolio information remains aligned with official statuses across jurisdictions, reducing the risk of deviations that surface only during renewal activities or audits.

Incorporated validation logic can reduce record errors by up to 70 percent, strengthening the reliability behind cost forecasts and portfolio decisions.

Every data point has traceable grounding in raw facts.

Record ID	Convention	Jurisdiction	Status
TM-1123521 Sample dispenser with priming cradle 21	National Trademark	Iraq	Registered
TM-1123522 Sample dispenser with priming cradle 22	European Union Trademark	Slovakia	Pending
TM-1123523 Sample dispenser with priming cradle 23	Madrid Protocol - Subseq.Ext.	Macedonia (North)	Inactive
TM-1123524 Sample dispenser with priming cradle 24	International Trademark	Caribbean Netherlands	Not Yet Filed
TM-1123538 Sample dispenser with priming cradle 38	Madrid Protocol	Thailand	Pending
TM-1123539 Sample dispenser with priming cradle 39	International Trademark	Indonesia	Inactive
TM-1123548 Sample dispenser with priming cradle 48	Madrid Agreement	Italy	Not Yet Filed

Centralize all IP activities

Feature

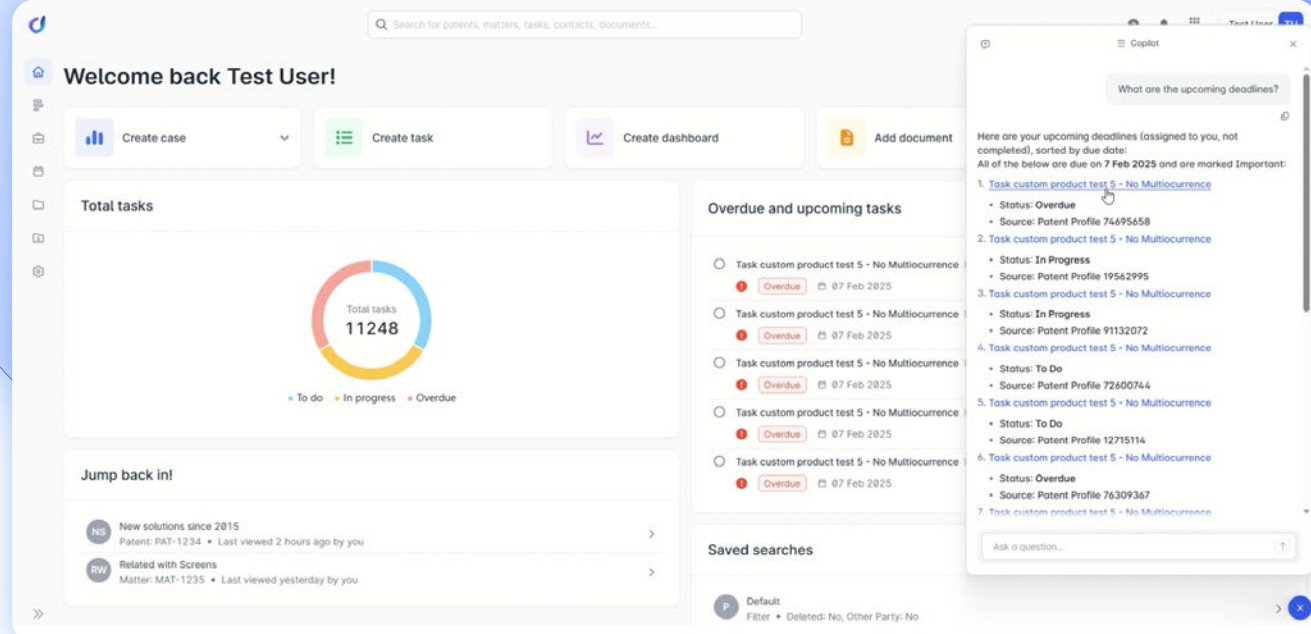

Deadlines, documentation, correspondence and renewal-related financials consolidated within one environment, with ownership clearly assigned.

Impact

Operational responsibility becomes visible, allowing escalations to proceed as intended. Parallel tracking tools and informal workarounds become unnecessary.

Deadline management, case-linked documentation, automatic European Patent Office (EPO) retrieval and integrated renewal budgeting operate inside a single coherent framework that preserves order as portfolios change.

AI features that redefine your day-to-day

Feature

Automated workflows and AI assistance integrated into daily operations.

Impact

Routine administrative workload can decrease by approximately 30 percent, enabling teams to redirect effort toward portfolio assessment and strategic prioritization.

AI searches in natural language retrieve matters, filings and historical records at scale. Users interact with connected, ready-to-use data rather than isolated entries.

Adoption is immediate because the interface reflects how IP teams already think and work.

Executive-grade visibility

Feature

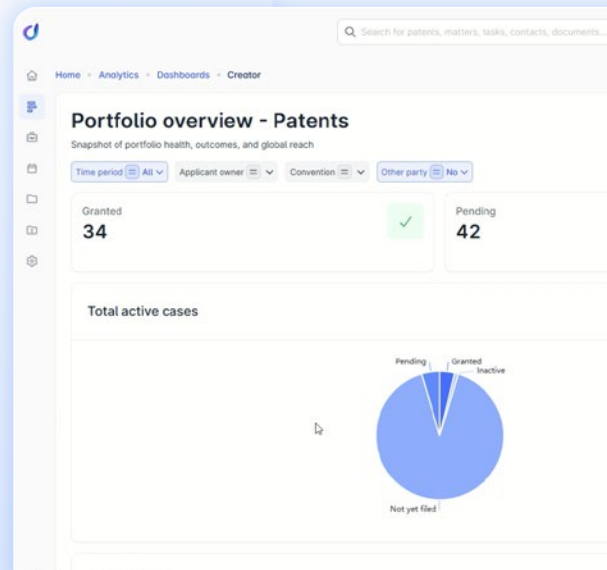

Dashboards translate portfolio insights for decision-makers.

Impact

Leadership gains direct visibility of due dates, cost exposure and status updates without manual gathering or sifting.

Reporting cycles shorten, and oversight becomes grounded in system-based evidence. IP activity becomes transparent at the management level and defensible in strategic discussions.

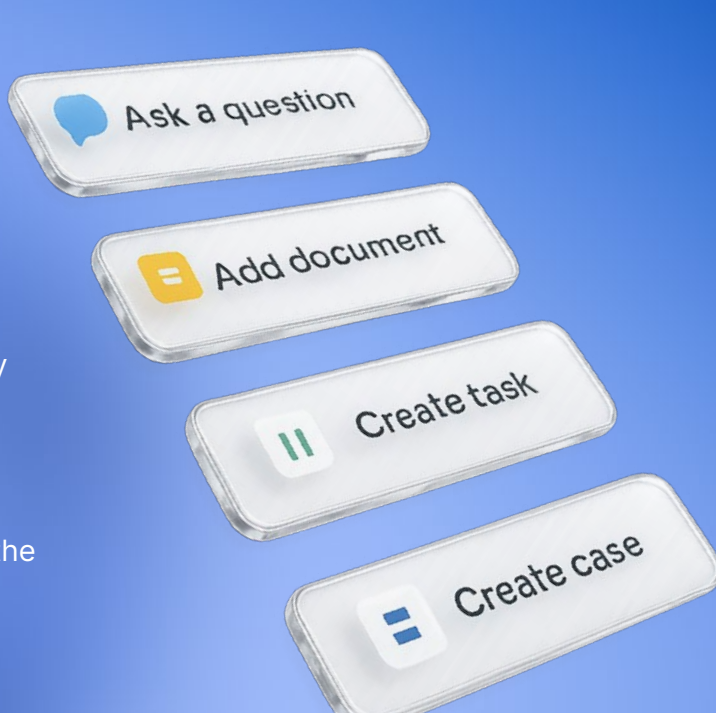

Portfolio-wide governance

DIAMS Infinity manages patents, trademarks, designs and utility models within the same platform – governed by the same logic and process control.

As filing volumes expand across jurisdictions and technologies, standard operational rules uphold the system's integrity and resilience.

Growth is something that can be controlled rather than a destabilizing

The DIAMS Infinity standard

Cloud-ready, AI-native configuration supports rapid deployment

UX-driven design eliminates friction at entry

Ongoing validation, automation and reporting establish measurable clarity from the outset

DIAMS Infinity shifts IP management from reactive maintenance toward disciplined oversight and strategic readiness.
