

Your project runs on documents. Are they under control?

Accelerate project delivery, improve contractor collaboration, and increase project profitability with our AI-native document platform.

Document Control

Single source of truth. Version control, lifecycles, and audit trails across every project.

Efficient Collaboration

All formats, including 2D/3D design files. Secure collaboration annotations, comments, and revisions in one place.

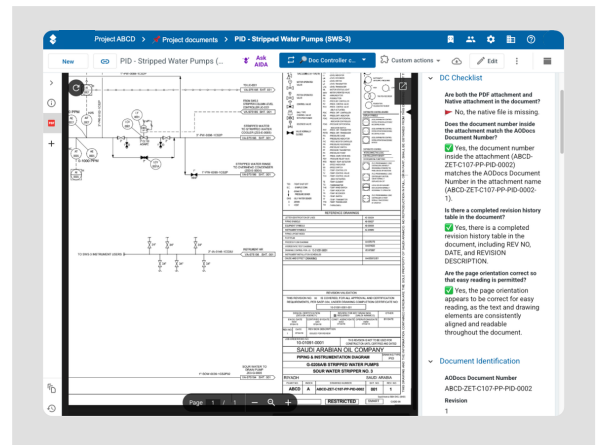

AI Automation

Instant, reliable answers for field teams. Automated tagging and metadata extraction save hours.

AI-Native Document Platform for Engineering & Construction

AODOCS is built for the rigor of engineering:

- Enforced lifecycles from IFR to IFC to as-built
- Automated Master Document Register
- AI quality checks on every drawing and spec
- Native viewers for 100+ formats, including Autodesk CAD
- Secure portals for EPCs and contractors

How leading E&C organizations use AODocs every day

From first drawing to final handover — AODocs at work

Capital Projects Documents

Automate the document lifecycle from preparation to commissioning. Bulk-import your Master Document List, create placeholders, automate document numbering and track overdue items in real time.

Information Access for Field Teams

Give field teams the latest approved version of every procedure, drawing or SOP on any device. The AODocs AI assistant delivers reliable, source-grounded answers from your governed knowledge base.

Supplier Management

Streamline procurement and supplier collaboration with secure, branded portals. Share contracts, collect compliance documents, onboard contractors and exchange files with full traceability.

Engineering-Grade Document Intelligence

AI Quality Control

AI validates metadata, formatting and compliance against your project rules. Catch inconsistencies and missing information early, and reduce manual review effort across thousands of drawings and specs.

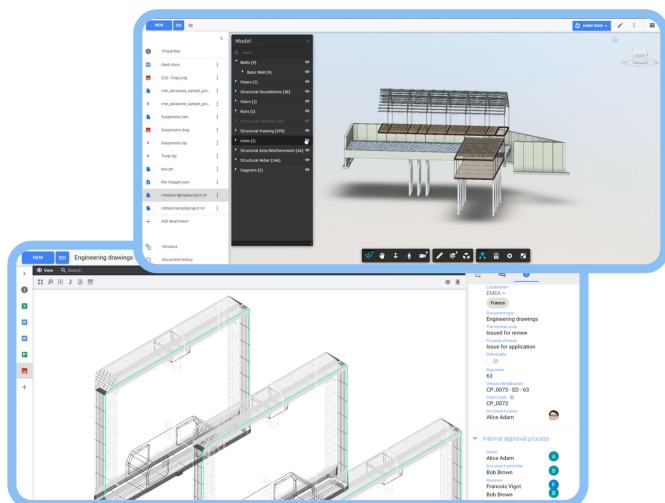

Automated Content Linking

AI extracts equipment tags, reference drawings and key data from your documents and builds bi-directional links to the equipment register, giving every team a 360° view in one click.

Advanced Viewer, Comparison & Annotations

Native support for 100+ formats including 2D/3D CAD (DWG, STEP, RVT, SolidWorks). Compare revisions, visualize X-refs, navigate, zoom and measure designs, all without leaving AODocs.
