

TANGANA

Textiles

Tangana Textiles

Producing fabrics that bring your vision to life

From GMO-free cotton to mixed compositions – our fabrics are the perfect canvas for your brand's casual apparel, athleisure, high fashion collections, or even lingerie.

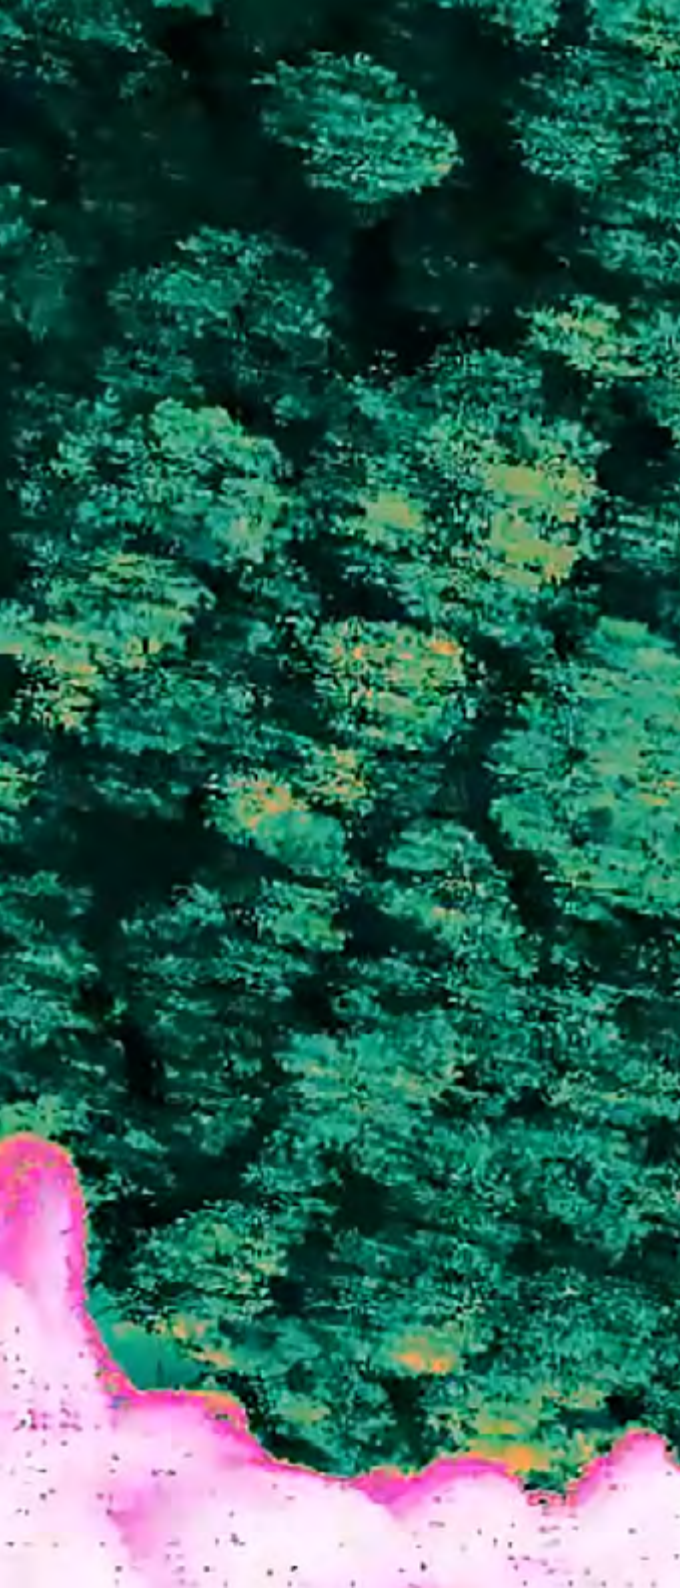

Tangana Textiles is a European producer and your wholesale source of eco-friendly cotton and mixtures.

Whether you are a private label, a premium retailer, a chain store, or a creative marketing agency, we cater to a wide range of clients across Europe and North America.

We specialize in flexible, made-to-order production, with a standard minimum order quantity (MOQ) of approximately 100 kg of fabric. To ensure your vision is fully realized, we offer custom dyeing services, allowing us to produce any color on any of our fabrics to meet your specific requirements.

Our team has been gaining experience in the textile market for over 35 years. We manufacture our products to the highest standards in Poland. As our business has grown over the years, we have also opened a Tangana Textiles branch office in Canada, so we can better serve our North American customers.

Go ahead, pour your ideas onto our fabrics and watch them come to life.

Sustainability woven into every thread

We believe that sustainability never goes out of style. We're all about reducing our environmental footprint and increasing our impact on the local community. That is why our fabrics and garments are sustainably produced and GMO-free. We also care about the well-being of workers involved in our supply chains, so we ensure safe and fair working conditions.

Our commitment to social issues and the use of eco-textiles is confirmed by the industry leading OEKO-TEX certification. You can trust that our products are good both for your business and the planet – they will meet your customers' quality standards and reflect your brand's eco-conscious values.

Sweatshirt Fabric

Sweatshirt fabric

(commonly known as tracksuit fabric or French Terry or Brushed Fleece) are versatile, soft, and flexible materials.

Depending on its weight (280 to 580 gsm) and composition (cotton with/without polyester), it is used for everything from lightweight activewear to heavy-duty, oversized streetwear. is a versatile, soft, and flexible material.

General Characteristics:

This knit fabric is created by interlocking loops of yarn, providing natural elasticity and excellent breathability. It typically comes in two finishes:

French Terry (Loopback): Features a flat, smooth top and a looped underside.

It is breathable and perfect for layering.

Brushed Fleece: The loops on the back are brushed to create a soft, fuzzy nap, providing superior thermal insulation and a “cozy” feel.

Composition & Properties:

Cotton (Primary Fiber): Provides natural softness, breathability, and skin comfort. High-cotton blends are ideal for everyday wear and are great for allergy-prone skin.

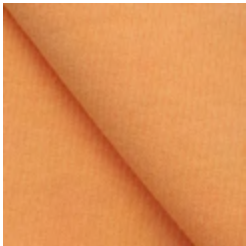

Polyester (Blend): Increases durability, reduces pilling, and minimizes shrinkage. It also helps the garment dry faster and resist wrinkling.

In summary, choosing a lower grammage (around 280) offers flexibility and all-season comfort, while higher weights (340+) provide the structured, premium feel often seen in high-end streetwear and winter apparel.

Single Jersey

SINGLE JERSEY

Single jersey fabrics are breathable, versatile and soft fabrics made from high-quality natural cotton fibers. It offers a smooth surface and a delicate drape.

Depending on its weight (140 to 300 gsm) and composition (cotton with/without elastane), it is used for everything from lightweight activewear to oversized streetwear.

Composition & Properties:

Cotton (Primary Fiber): Provides natural softness, breathability, and skin comfort. High-cotton blends are ideal for everyday wear and are great for allergy-prone skin.

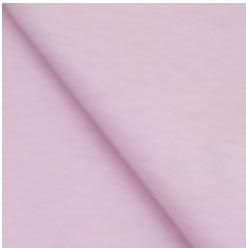

Elastane (Blend): It ensures the fabric stretches comfortably and snaps back to its original shape.

Interlock Knit

INTERLOCK FABRIC

is a double-knit fabric known for its smooth surface on both sides and excellent structural stability. Composed of 80% polyamide and 20% elastane, it offers a perfect balance of durability, soft touch, and exceptional multi-directional stretch. With a weight of 210g/m², the fabric provides full opacity (squat-proof), a subtle matte finish, and a supportive, compressive feel that retains its shape even after intensive use and washing.

General Characteristics:

High elastane content ensures maximum freedom of movement.

Moisture Management - Polyamide fibers effectively wick sweat away and dry quickly.

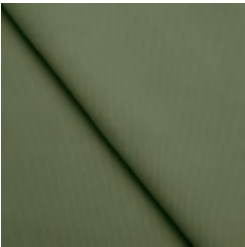

Durability - Highly resistant to pilling and abrasion.

Breathability - Ideal for skin-tight garments, ensuring thermal comfort.

POLYAMIDE INTERLOCK 210

COMPOSITION:	80% POLYAMIDE, 20% ELASTANE
WEIGHT (+/- 5%)	210 (gsm)
WIDTH (+/- 5%)	160 (cm)
PERFORMANCE	2.9 (lm/kg)
CHARACTERISTICS	stretch, durable, breathable, recovers its shape, compressive feel
COMMON USES	premium leggings, sport bras, compression tops, yoga wear, leotards, cycling shorts, body-contouring sets

Rib

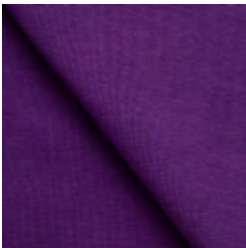

RIB KNIT 1/1

This premium 1/1 rib knit fabric offers a perfect blend of natural comfort and functional elasticity. Made primarily from high-quality cotton fibers, it is exceptionally soft, breathable, and skin-friendly. The 3% elastane content provides stretch and recovery, ensuring the fabric maintains its shape and “springs back” even after frequent wear and washing. It features a fine, vertical corded texture that is identical on both sides, making it a versatile choice for professional garment finishing and body-hugging designs.

COMPOSITION:	97% COTTON, 3% ELASTANE
WEIGHT (+/- 5%)	220 (gsm)
WIDTH (+/- 5%)	160 (cm)
PERFORMANCE	2.8 (lm/kg)

RIB KNIT 2/1

This high-quality 2/1 rib knit fabric combines the natural breathability of premium cotton with the superior elasticity of elastane. The 2/1 construction creates a distinct, vertical textured pattern that offers significantly more stretch and recovery than a plain jersey fabrics.

General Characteristics:

High Elasticity: The 6% elastane content ensures the fabric stretches easily and returns to its original shape without savgging.

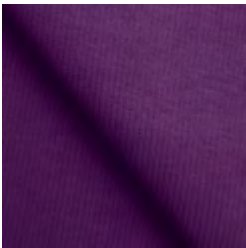

Breathability: Made primarily from cotton, it is soft on the skin, moisture-wicking, and comfortable for all-day wear.

Perfect Fit: It naturally contours to the body, making it ideal for form-fitting garments.

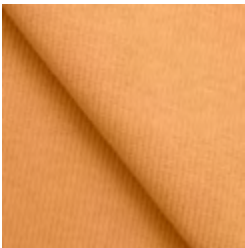

COMPOSITION:	94% COTTON, 6% ELASTANE
WEIGHT (+/- 5%)	350 (gsm)
WIDTH (+/- 5%)	105 (cm)
PERFORMANCE	2.8 (lm/kg)

Bamboo Single Jersey Rib

BAMBOO FABRICS

This premium fabrics are a high-quality knit that combines the natural benefits of bamboo fibers with the flexibility of elastane. It is exceptionally soft to the touch, offering a “silky-smooth” feel against the skin.

General Characteristics:

Breathability & Thermoregulation: The high bamboo content ensures excellent moisture-wicking properties and breathability, keeping the person cool in summer and warm in winter.

Drape & Fluidity: Due to the nature of bamboo viscose, the fabric has a beautiful, liquid-like drape, making it perfect for designs that require movement.

Elasticity: The 5% elastane blend provides excellent shape recovery, preventing the garment from bagging out.

Antibacterial & Hypoallergenic: Naturally resistant to odor-causing bacteria and gentle on sensitive or allergy-prone skin.

Eco-friendly appeal: Bamboo is a rapidly renewable resource, making this a more sustainable choice for conscious fashion.

Pique Knit

COTTON PIQUE FABRIC

This premium pique knit fabric is characterized by its distinctive geometric, honeycomb-like texture. Crafted from 100% high-quality natural cotton, it offers a perfect balance of durability, breathability, and timeless elegance. The unique “tucked” stitch construction creates a subtle 3D structure that allows for superior air circulation, making it a favorite for year-round wear.

General Characteristics:

Composition: 100% Cotton.

Texture: Classic micro-dot honeycomb structure (Pique).

Breathability: Highly porous weave ensures excellent moisture-wicking and thermal comfort.

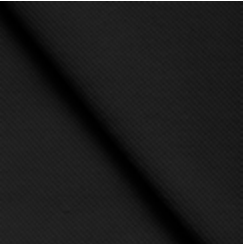

Durability: Robust construction that maintains shape even after frequent washing.

Finish: Soft to the touch with a matte, sophisticated appearance.

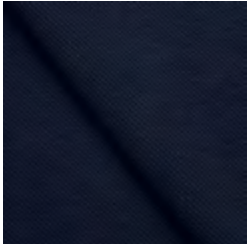

Eco-friendly: Made from natural fibers, being fully biodegradable and skin friendly.
