Les savons de Simone

"Bring back from a trip a small, good smelling and
organic “souvenir?”

Simone's soaps are personalized soaps for museums, amusement parks, zoos,
tourist offices, associations, goodies etc...

The idea is to to bring back from a trip a small eco-friendly "souvenir".

The soap is handmade and engraved with your name or Simone's flower

Metal packaging
with your logo

Recycled packaging

Some examples of packaging already made on demand for goodies or original boxes

the soap and its engraving

The soap can be engraved with your logo or your name, you can also choose your scent.

By default, the soap is engraved with the Simone flower logo and the soap smells like honey.

Some samples

Composition and origin

Simone's soaps are handcrafted soaps made in Marseille,
98% organic origin. No tests on animals.

You have the choice of scent, the scent of choice is honey.

The cardboard packaging comes from forests labeled "sustainable management", the printing is done in Belgium.

The recycled metal boxes come from Europe.

The paper also comes from "sustainable forest management", the printing is made in Europe.

The packaging workshops are in France or Belgium.

Who is Simone?

I chose to call my soaps Simone, because it was at the Horta museum that I got the idea of personalized soaps.

Simone was the daughter of Victor Horta.
