

VltoVI

PRESS RELEASE

SPRING SUMMER 2027

VIBE TO VIBE

For SS27, VltoVI continues its aesthetic journey through a collection that reinterprets deconstructed tailoring with a contemporary and international perspective.

The new season emerges from the meeting of sophisticated citywear and a utility-inspired spirit, blending metropolitan influences, natural materials, and relaxed silhouettes. The SS27 wardrobe moves effortlessly between functionality and refinement, creating a natural balance between sartorial precision and freedom of movement.

Light jackets and deconstructed constructions define a new vision of everyday elegance: less rigid, more lived-in, and more authentic.

Alongside the brand's iconic styles, the season introduces two new proposals that expand the collection's visual language: the overshirt and the gilet. These elements reinterpret the utility aesthetic that defines SS27, designed through lightweight layering and dynamic styling, combining functionality with relaxed sophistication.

The collection explores a rich yet essential material language.

Slub linens, technical cottons, and lightweight surfaces coexist with tailored checks and micro-patterns, creating visual depth and movement. The color palette reflects the Mediterranean landscape through dusty, natural tones: deep burgundy, ice blue, sage green, washed blues, and warm neutrals.

With *VIBE TO VIBE*, VltoVI reaffirms its vision of contemporary luxury, built on balance, versatility, and understated character.
