

MILKING MATERIAL

FACILITY CLEANING OF MILKING

ACIDIA

Descaling & cleaning of milking circuits

- Acid formulation based on phosphoric and sulfuric acid.
- Detergent and descaling properties.
- Non-foaming.

ALCA

Disinfection & cleaning for milking circuits

- Alkaline formulation based on sodium hypochlorite.
- Rich in surfactants and formula stabilizers.
- Very strong detergent property.

ALCAPRO SC

Chlorine-free cleaning for milking equipment

- Alkaline formulation without chlorine.
- Suitable for milking robots.

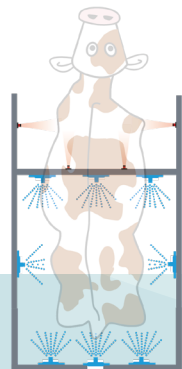

ALCA SC L

Chlorine-free cleaning for milking equipment

- Concentrated product.
- Chlorine free.
- Without EDTA.
- Can be used with milking robot and when chlorine is prohibited.

PODO'MATIC®™2.0

THE NEW WEAPON AGAINST LAMENESS IN DAIRY COWS

PODO'MATIC®™2.0 is a system for cleaning and disinfecting cattle hooves. Animals are detected by two photoelectric cells, which trigger automatic spraying by the nozzles.

ADVANTAGES : By enabling regular cleaning and disinfection of the feet, **PODO'MATIC®™2.0** is a tool for preventing infectious foot diseases (ie. Mortellaro).

UDDER CLOTH HYGIENE

KLINOPIS

Liquid detergent for udder clothes disinfection

- Teat cleaning.
- Udder clothes disinfection.

DISINFECTION OF MILKING LINERS, ROBOT BRUSHES AND MILKING CIRCUITS

OXYGRIFFE

Deep cleaning of milk collection circuits

- Formulation based on hydrogen peroxide and peracetic acid.
- To be sprayed directly in the liner or diluted in a bucket (see **GRIFF'MATIC** material).

TEATS CLEANING

NATURALIS

Cleansing & moisturizing foam

- Formula based on essential oils, enriched with substances moisturizing & emollient.
- Removes dirt thanks to its great wetting power.
- Good hold on the teat.

TEATS DISINFECTION

IOFOM

Cleansing & disinfectant foam

- Synergy of iodine (PVPi) and a disinfectant action booster.
- Nice foam and emollients for better teat hydration.
- Usable with **MOUSS'MATIC**.

DUO MOUSSE

Cleaning and flash disinfection foam

- A bi-component formula, chlorine dioxide.
- Almost instantaneous disinfection of the teats.
- Genuine formula with two components producing chlorine dioxide after mixing.
- Usable with **MOUSS'MATIC**.

HYMA-JET II

Sprayable disinfectant & cosmetic liquid

- Formulated with LGA, an exclusive combination of lactic acid and glycolic acid.
- Quick disinfection within 30 sec.
- Can be sprayed before and after milking, can be used with a milking robot.
- Usable with **TREMP'MATIC**.

DUO-JET

Disinfectant for dipping or spraying

- Original formulation with bi-component to form a mixture of chlorine dioxide.
- Almost instantaneous disinfection of the teats.
- Can be sprayed before and after milking.
- Can be used with a milking robot.

IODI-JET

Sprayable liquid before and after milking

- Ready-to-use product for spraying.
- Formulated with three disinfectant molecules: iodine, lactic acid and glycolic acid.
- Usable with **PULVE'MATIC**.

See the video on 'MATIC hardware

Usable in Organic Agriculture.

Complies with EC Regulation No. 2018/848 et 2021/1165. Users are encouraged to verify their compliance with the regulations in force at the time of their employment.

SOFT SHELL DIPPING

PRODUCING A SHORT TIME PROTECTION SHIELD ON THE TEAT.
NO REMOVABLE COVER AT NEXT MILKING

PHITEOS

Very cosmetic film-forming soak

- A mixture of fruity acids, glycolic acid and essentials oils .
- Strong superfatting virtues.
- Usable with **TREMP'MATIC**.

ALGOFILM

Cosmetic soak & disinfectant

- Synergistic formulation of iodine (PVPi), lactic acid and seaweed extracts.
- Strong superfatting virtues.
- Usable with **TREMP'MATIC**.

ALOE FILM

Cosmetic soak & disinfectant

- Combination of two disinfectant molecules based on fruity acids, milk acids and 3 agents cosmetics for optimal protection.
- Usable with **TREMP'MATIC**.

PROTECTO GLE

Highly cosmetic & disinfectant soak

- Combination of two disinfectant molecules based on fruit and milk acids.
- GLE formulation: combination of three cosmetic agents: Glycerin, Lanolin, Vitamin E.
- Can be used with **TREMP'MATIC**.

SPECIAL MILKING ROBOTS

SPRAY GUARD

Sprayable barrier liquid suitable for milking robots

- **Rapid disinfection in just 30 seconds.**
- Original formula based on iodine and glycolic acid.
- Dermorhéologie technology : uniform film over the entire teat, with a drop targeted at the sphincter.
- Combined surfactants : better distribution of active ingredients and enhanced effectiveness over time.
- Cosmetic effect : supple, smooth, and well-maintained teats.

BARRIER DIPPING

IODIGUARD

Highly protective disinfectant soak

- Barrier effect provides a strong disinfectant capacity: acts especially on environmental mastitis.
- Film present between 2 milkings.
- Easy removal of the shield.
- Drip-free.

PYGUARD

Very cosmetic & disinfectant soaking

- Synergistic blend of fruit acids, glycolic acid, essential oils and shea butter for intense hydration of the skin.
- Flexible breathable film, easy to remove.
- Usable with **TREMP'MATIC**.

DUO VERDE

Cosmetic soak & flash sanitizer

- Original two-component formulation forming chlorine dioxide in a mixture.
- Powerful disinfection and teat flash.
- Its components used in human cosmetology protect teats skin.
- Real chemical barrier, easy to remove at the next milking.
