

Orion

9-core LED 6500 lumens

ORION is a **high-end**, long-range tactical flashlight, delivering up to **1300 metres!** ORION provides highly efficient long-throw lighting with an immediate, very long lighting distance. Maximum 6500 lumens, 425,000 candelas, 300 hours of runtime in ultra-low mode.

Ideally suited to tactical uses such as the military, security forces, search, rescue, hunting, boating, observation, monitoring of mountain and livestock animals, protection of sensitive areas, caving, land, sea and air patrols, as well as outdoor activities. **Solid, rugged** design, non-slip body, excellent grip.

PRACTICAL INFORMATION

2 uses: high-power flood and spot
Modes: Turbo / High / Medium / Low / Ultra-low / Strobe / SOS

HIGH-POWER FLOOD MODE

	LUMENS	RANGE	RUNTIME
TURBO	6500LM	1100M	3H
HIGH	2500LM	600M	4H
MEDIUM	400LM	350M	7H
LOW	100LM	150M	40H
ULTRA-LOW	10LM	50M	300H
STROBE / SOS	2500LM	-	-

SPOT MODE

	LUMENS	RANGE	RUNTIME
TURBO	2500LM	1300M	4H
HIGH	900LM	850M	5H
MEDIUM	400LM	600M	7H
LOW	100LM	400M	40H
ULTRA-LOW	10LM	150M	300H
STROBE / SOS	2500LM	-	-

FEATURES AND BENEFITS

ORION features **3 switches**:

- The tactical tail switch turns it on or off: a short click to turn it on or off, a half-click for **silent tactical mode**.
- The functional side switch for easy use, mode switching and charge-level indication. Mode memory.
- Assault58 innovation, **rotary ring switch**: spot mode (activates the central 2500 lm core) or high-power flood mode (activates all 9 cores, 6500 lm).

ORION combines the functionality of a wide floodlight with long-range lighting for versatile use.

IP68 waterproof: ORION can be submerged down to 2 m for 30 minutes and is designed to withstand drops from 1.5 m and thermal shocks.

6500 lumens

Runtime 300h

Range 1300m

Item type	Very long-range tactical flashlight
Lens	OP reflector, aluminium alloy
3 switches	1 tactical / 1 side / 1 rotary ring
Lighting modes	7 modes incl. strobe and SOS
Max range	1300 m (1100 m in high-power flood)
Runtime	3 to 300 hours
Charger	Mains + USB Type-C
Materials	6061-T6 aluminium, hard-anodised black
Light source	Neutral white LED
Glass	Ultra-hard double-sided coating
Light output	6500 lm / 425,000 candelas / 17,000 lux
Rechargeable battery	2 × 21700 Li-ion 3.7V, 10,000 mAh
LED lifespan	50,000 hours
Battery lifespan	500 charge cycles
Charge indicator	On side switch
Protection rating	Waterproof IP68
Dimensions/Weight	L 253 × Ø 26 mm and Ø 65 mm / 410 g
Charging	Type-C, fast charging
Warranty	1 year

Box contents: ORION – 21700 battery pack, 9V 2A mains charger, USB/USB-C charging cable, lanyard, Cordura holster (MOLLE + hook), user manual.

Orion

User manual

ORION is a high-end flashlight manufactured to a very high quality standard, ensuring many years of reliable use.

Before using ORION, please read this user manual. It contains essential safety and start-up information.

OPERATING INSTRUCTIONS

1- Operating modes

Remove the battery protection by unscrewing the tail switch.

1. Main tail switch: half-click to turn on in silent tactical mode, short click to turn on/off.

2. Functional side switch (for easier use).

Click: Turbo > High > Medium > Low > Ultra-low (cycle)

Long press: strobe on; short click to return to the memorised lighting mode.

3. Rotary head ring for lighting modes: choose between Spot mode (activates the central core) and High-power flood mode (activates all 9 cores).

2- Charging function

1- The USB Type-C charging port is on the upper part of the ORION body, in front of the rotary ring switch; make sure the silicone cover is put back in place. ORION smart, fast external charging at 5V/2A (9V 2A (18W) mains charger included in the box for greater safety), maximum recharge time 3.5 h.

2. Charge indicator: the red light shows charging; the green light shows a full charge.

3. Power capacity indicator: shows the battery level for 5 seconds after the light is switched on. Always be ready thanks to the charge indicator.

75 %-100 %: green indicator

30 %-75 %: orange indicator

10 %-30 %: red indicator

Below 10 %: flashing red indicator

4. Electronic components protected by a thermostatic diode, with brightness adjustment regulating the temperature to prevent overheating.

3- Loading the battery

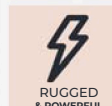

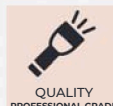

1- Insert the battery with the (+) end towards the head of the flashlight.

2- For long-term storage, please unscrew your ORION. Fully recharge your ORION once a year.

SAFETY INSTRUCTIONS

Never shine the light directly into anyone's eyes: this may cause eye damage. Keep out of the reach of children.

Do not attempt to repair the light yourself, as you could damage it. Electrical waste (battery and bulb) must be taken to dedicated electrical waste collection points.

MAINTENANCE AND PRECAUTIONS

For best use, clean fingerprints off the lens with a soft cloth. To prevent the O-rings from drying out and to maintain maximum waterproofing, apply petroleum jelly once a year (two or three times a year in marine use).

If water gets inside the light, remove the battery immediately and let everything dry. Reinsert the battery in the body of the light with the + end towards the head and the - end towards the switch.

Warranty

The ASSAULT flashlight has been carefully tested and inspected before shipping. It is free from defects in materials and workmanship and carries a 12-month warranty from the date of purchase. Damage caused by normal wear or misuse is not covered by this warranty.
