

ASSAULT⁵⁸

VIGIE Dualis

User manual

VIGIE DUALIS is a high-end flashlight manufactured to a very high quality standard, ensuring many years of reliable use.

Before using VIGIE DUALIS, please read this user manual. It contains essential safety and start-up information.

OPERATING INSTRUCTIONS

1- Operating modes

Remove the battery protection by unscrewing the tail switch. Quick and intuitive operation with two tactical tail switches: the central one (MAIN) and the side one (MODE).

Exclusive: Assault58 innovates once again with Tactical/Civil inversion. VIGIE DUALIS lets you switch between Tactical mode and Civil mode:

In Tactical mode: Turbo > High > Medium > Low > Ultra-low. Tactical strobe (Tactical mode only): press the MODE button and release it within 2 seconds, VIGIE DUALIS switches off. A long press activates the tactical strobe; click again to return to the previous intensity.

In Civil mode: the order is reversed, with direct activation on Ultra-low by pressing and holding the MODE button. SOS (Civil mode only): with VIGIE switched on, hold the MODE button for more than 3 seconds; click to return to the previous intensity. **Note that Turbo mode is always instantly available by pressing or clicking the main switch.**

2- Dualis programming

Quick and simple, a combination of the two DUALIS switches gives you full control. *Tactical reliability. Total adaptability. Mastered technology, disciplined power.*

Simple, intuitive interface with VIGIE DUALIS switched off: hold the MODE button for 5 seconds (the indicator flashes red/green). While still holding MODE, press the MAIN button to switch between Mode 1 (Tactical) and Mode 2 (Civil). Note: the MODE and MAIN buttons must both be held down.

Simple controls: – CENTRAL switch: half-press to turn on silently in tactical mode, or full click to turn on or off. – Side switch: change intensity and access special functions, strobe or SOS, by pressing and holding (depending on the selected mode). Instant access to the tactical strobe with a single press: an essential function.

3- Charging function

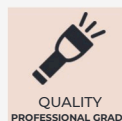

Fast external USB Type-C charging (5V/2A), protected by an O-ring and a screw-on ring to keep it waterproof. **The smart charge indicator shows the battery status in real time:** green (100–75 %), orange (75–30 %), red (30–10 %), flashing red below 10 %. While charging: red (charging), green (fully charged). Each time the light is switched on, the indicator displays the charge level for 5 seconds.

4- Battery installation and charging

- 1- Insert the battery with the (+) end towards the head of the flashlight.
- 2- Unscrew the waterproof ring to access the USB-C port, then plug in.
- 3- Retighten the waterproof ring firmly.

& POWERFUL

SAFETY INSTRUCTIONS

Never shine the light directly into anyone's eyes: this may cause eye damage. Keep out of the reach of children.

Do not attempt to repair VIGIE Dualis yourself, as you could damage it. Electrical waste (battery, electronics) must be taken to dedicated electrical waste collection points.

MAINTENANCE AND PRECAUTIONS

For best use, clean fingerprints off the lens with a soft cloth. To prevent the O-rings from drying out and to maintain maximum waterproofing, apply petroleum jelly once a year (two or three times a year in marine use). If water gets inside the light, remove the battery immediately and let everything dry. Reinsert the battery with the + end towards the head and the – end towards the switch.

Warranty

The ASSAULT58 VIGIE Dualis flashlight has been carefully tested and inspected before shipping. It is free from defects in materials and workmanship and carries a 24-month warranty from the date of purchase. Damage caused by normal wear or misuse is not covered by this warranty.

VIGIE

Dualis

The versatile tool that adapts its light to your needs: **VIGIE** offers a solution for every situation.

High-end tactical flashlight meeting the highest standards, designed to combine power, endurance and discretion. Switch from one extreme to the other with control and discretion.

2,300 lumens, 64,400 candelas, 510 m range and up to 120 h runtime, external charge indicator, power, endurance: VIGIE meets the most demanding needs, even on the longest nights.

Assault58 exclusive: the DUALIS system (inverted intensity) allows Tactical / Civil inversion. Intense to cover wide areas or ultra-low to preserve your discretion, **DUALIS adapts to you – not the other way round.**

PRACTICAL INFORMATION

Featuring **7 lighting modes + Dualis** and a dual tail switch, VIGIE offers smooth, silent control, from ultra-low to instant turbo.

Its **matte black anodised body**, balanced and non-slip, provides an excellent grip with or without gloves. Its crenellated stainless-steel head is ready for emergency or self-defence situations.

Rugged and reliable, **VIGIE Dualis** withstands shocks, water and extreme environments, built to stand the test of time.

In a world where every challenge calls for tailored solutions, **VIGIE Dualis** stands out as **the benchmark in professional tactical lighting**, also ideal for: search and rescue, hunting, boating, security, airsoft, animal monitoring, caving, patrols, agriculture, industry and outdoor activities.

MODE	Lumens	Max runtime (h)	Lux	Candela (cd)	Max beam (m)
Turbo	2300	4	16100	64400	510
High	900	4.5	6100	24400	310
Medium	400	9	2200	8800	188
Low	100	32	630	2520	100
Ultra-low	10	120	56	224	30
Strobe	2300	-	-	-	-
SOS	2300	-	-	-	-

Note: test data based on a 21700 3.7V 5000mAh battery.

FEATURES AND BENEFITS

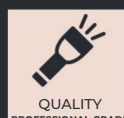

Two profiles, one flashlight

Tactical mode:

- Direct activation on Turbo
- Descending order: Turbo > High > Medium > Low > Ultra-low
- Strobe access by long press (MODE)

Civil mode:

- Direct activation on Ultra-low (long press MODE)
- Ascending order: Ultra-low > Low > ... up to Turbo
- SOS access (MODE > 3 seconds)

2300 lumens

Runtime 120h

Range 510m

IMPACT RESISTANT

DUALIS SYSTEM

Versatile long-range tactical flashlight, up to 510 metres

Multifunction electronic dual tactical switch

Seven lighting modes (including Strobe and SOS)

Position memory + < or > Tactical or Civil

6063 aluminium alloy, hard-anodised matte black finish

Luminus SFT40.2 LED, cool white

2,300 lumens / 64,400 candelas / 16,100 lux

Ultra-tough glass with double impact- and heat-resistant coating

1.5 m drop resistant. Aluminium alloy reflector.

Integrated crenellated stainless-steel glass-breaker head

1 × 21700 3.7V 5000 mAh battery

Runtime from 4 to 120 hours. Over 500 charge cycles

Smart, fast external USB-C charging, 5V 2A.

Charging port protected by O-ring under a screw-on ring.

Tri-colour side charge indicator and power indicator

Waterproof IP68

Dimensions/Weight: L 153 mm, Ø 34 mm and Ø 25.4 mm / 188 g (battery incl.)

Warranty*: 2 years (battery 1 year)

Box contents: VIGIE, 5000mAh 21700 battery, belt clip, lanyard, USB-C cable, user manual.
