8 double-sided pairs in 4 colors

Packaging lid from inside

PORIGAMI

We create unique paper art using laser-cutting and hand-made stamps. We transform paper sheets into 3-dimensional card objects. Our collection includes greeting cards based on themes such as fauna, flora and architecture as well as paper decorations like mobiles and garlands. We create custom-designed business cards, invitations or souvenir cards, pop-up presentations and paper installations.

Tereza Hradilková, nicknamed PORI by her sister as a child, is a trained architect who lived in Asia between 2007 and 2013. Over there, she started experimenting with paper, GAMI in Japanese.
