

Maldestre

Objects inspired by places

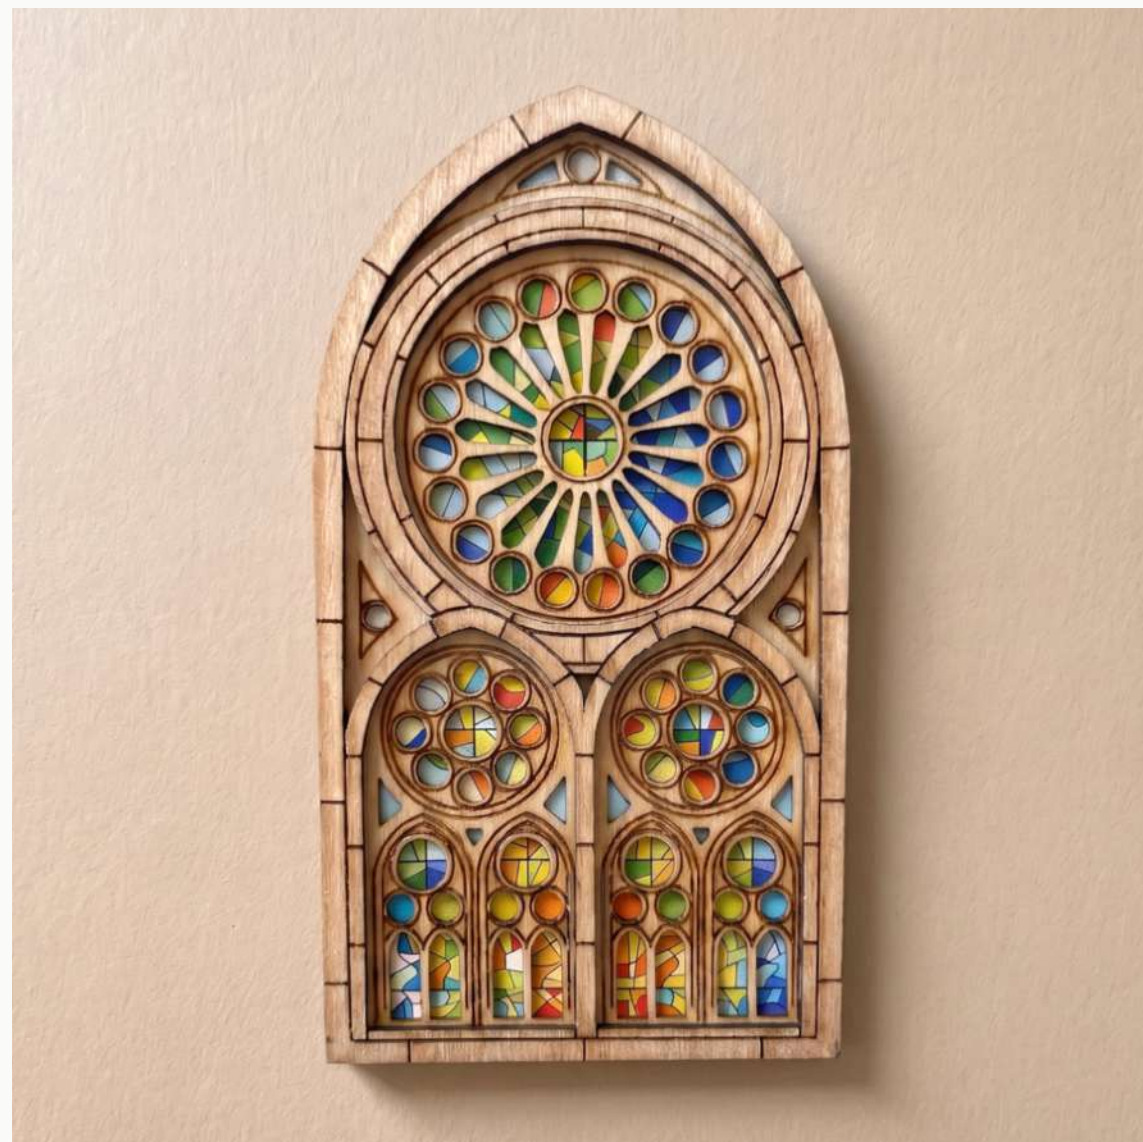

Bespoke collections for cultural destinations

WHAT WE DO

From concept to finished piece, at Maldestre we create product collections inspired by architecture, heritage and local identity, transforming what makes each place unique into distinctive singular objects.

OUR WORK

Our work spans some of Spain's most iconic landmarks, exploring different materials, techniques and finishes to give each project its own character.

Beyond place-inspired collections, we also develop made-to-measure products for cultural institutions, responding to specific ideas and needs — from pieces incorporating their visual identity to original formats created exclusively for them.

Unique places.
Unique creations.

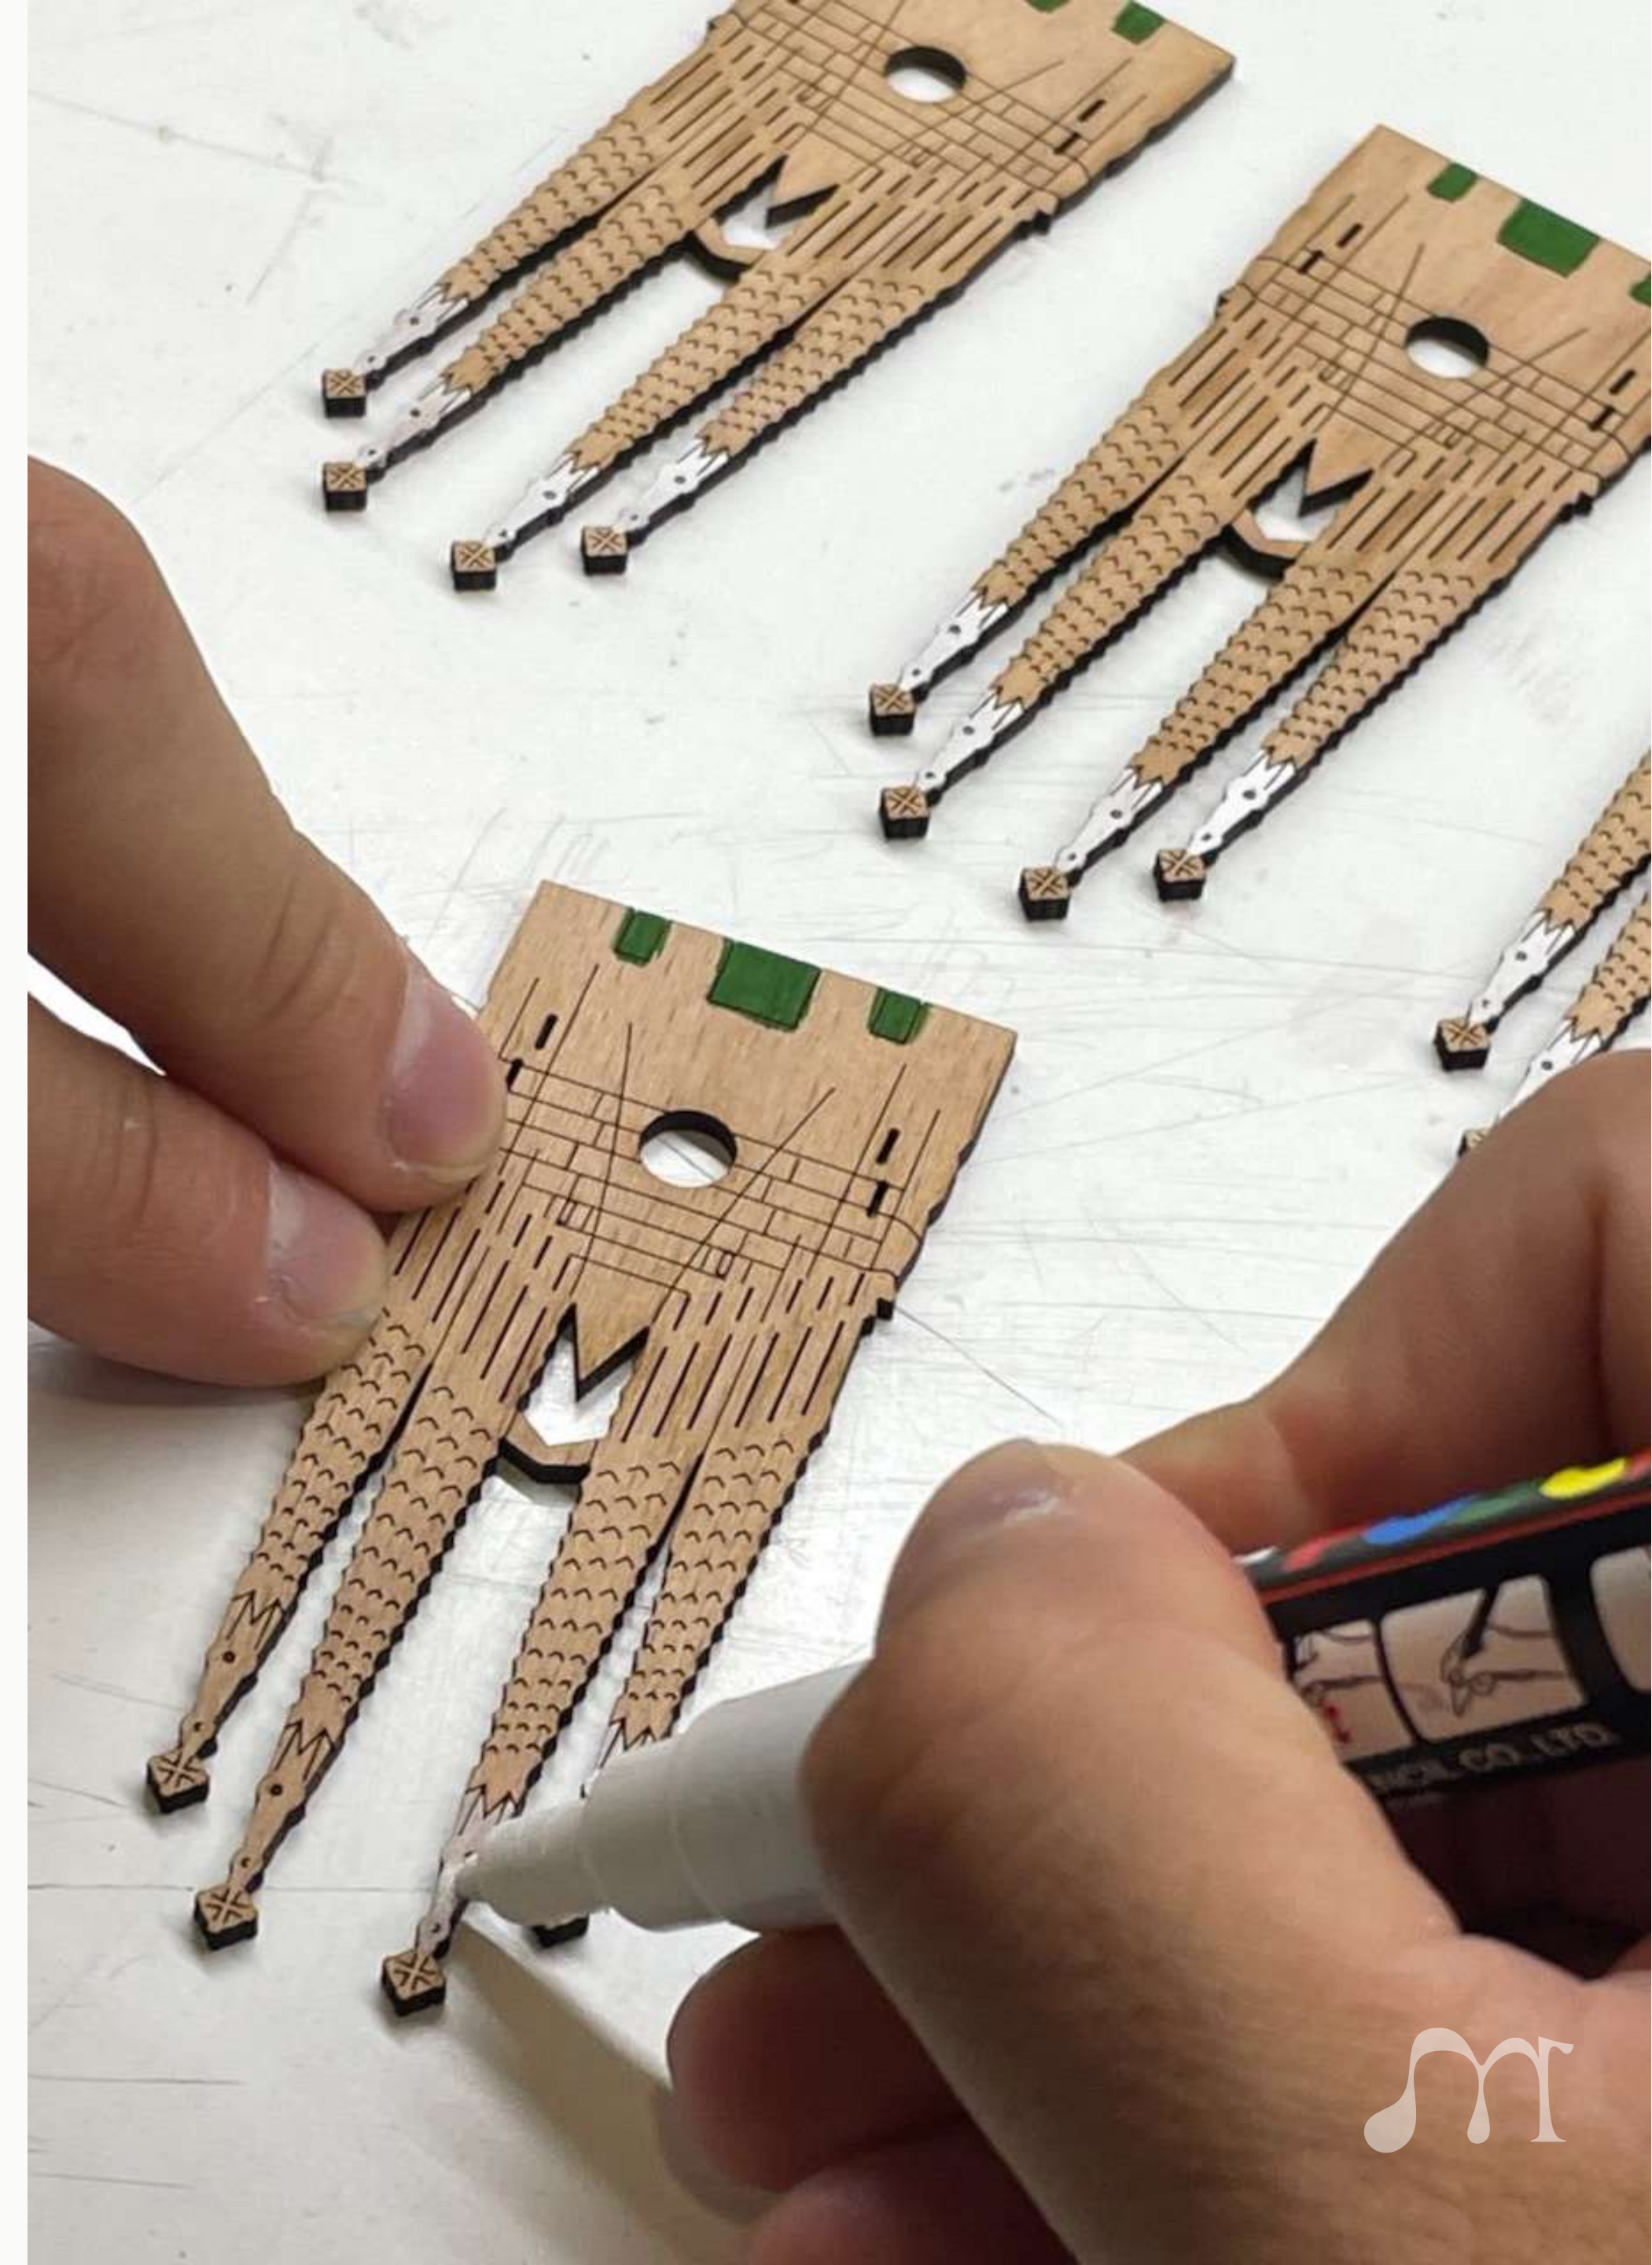

PRODUCTION

Every product is developed and locally produced in our own workshop in Barcelona, combining digital manufacturing with careful hand-finishing.

Our flexible production allows us to adapt to each project, from limited editions and small runs to larger-scale production.

Designed and made
in Barcelona

Your place.
Your story.
Your collection.

MADE-TO-MEASURE CREATIONS

Every place has something unique to tell. Yours too.

Upon demand, we can interpret the architecture, history and character of your iconic place to develop objects that capture what makes it special.

We can also create custom products for special events to make that one-of-a-kind piece that fits your exact needs.

Let's create something together

Whether developing a new collection, creating a special edition or exploring an entirely new product, we would love to hear about your project and discover what we can create together.
