

Reemo

Centralize and Secure Your Remote Access.

Reemo protects access to all your sensitive resources through a cloud-native, audited and certified platform.

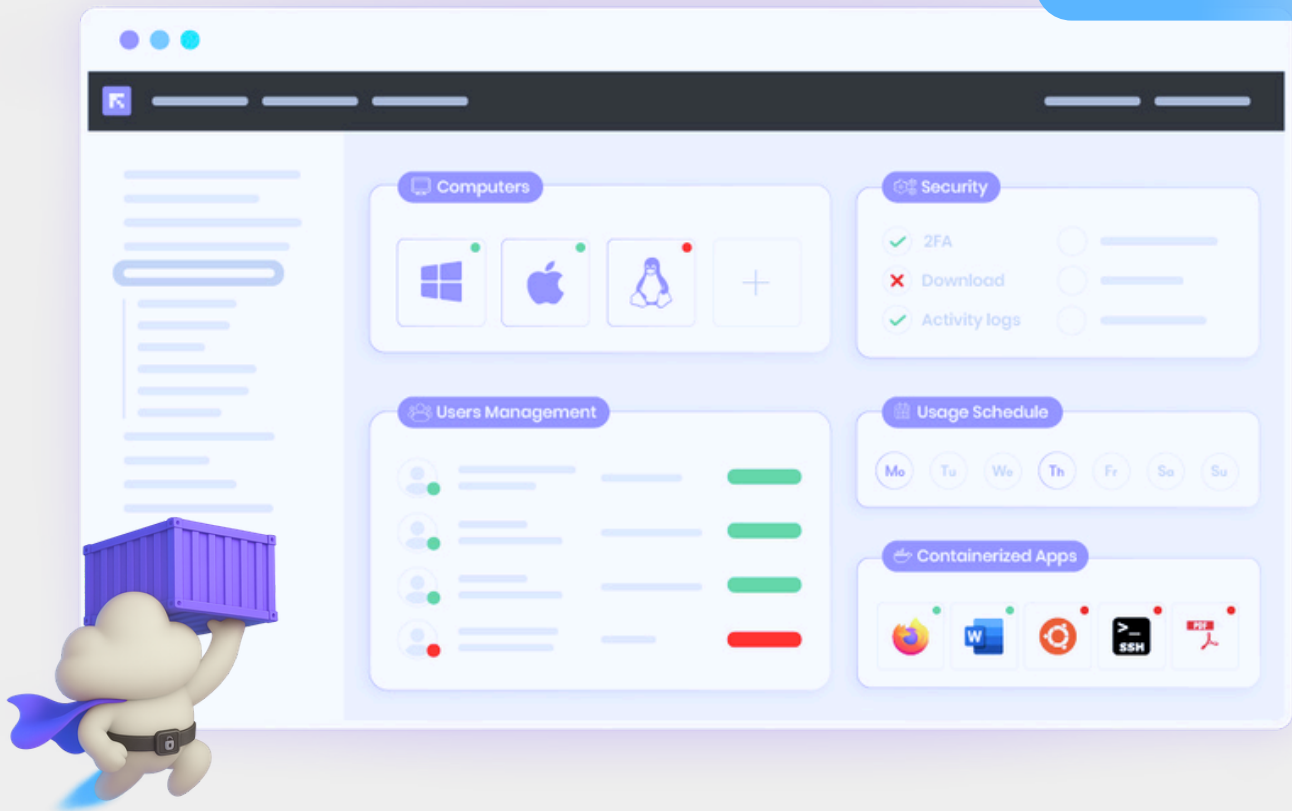

Our products

A platform for all your secure remote access needs

Unified and intuitive
management interface

Custom Branded
experience

All powered by our proprietary **high performance** remote desktop protocol

Zero Trust Security

Built-in encryption, protocol break, graphical containerization and least privilege principle reduce attack surface.

Zero Complexity

Simple remote work without complex setups. Just open your browser and go.

Near-Zero Latency

Ultra-low latency, 4K, 4:4:4 and 60FPS boost productivity and collaboration for power users.

Reemo **centralizes and secures all remote access** to your company's resources within a single high-performance platform.

Browser-Based

User friendly

Secure by design

Reemo Desktop

Reemo Desktop offers **high-performance, secure, and simple remote access to physical computers or virtual machines**, via a simple browser, with **near-zero latency** and **4K** resolution at **60FPS**.

Remote Office Setup

BYOD

Reemo Containers

Reemo Containers provides **minimalist and secure graphical environments through containerization**, establishing a protocol break between users and the resources they access. This ensures isolation, performance, and security for demanding apps, including 3D workloads.

RBI

Legacy apps

Bastion +

OSINT

BYOD

Reemo DaaS/VDI

Reemo VDI solution **virtualizes your desktop environments** on **ultra-secure servers** located wherever you choose, offering **secure, high-performance remote access from anywhere, on any device**.

Burst Workloads

Test environments

Disaster recovery

Reemo Workspaces

Reemo Workspaces offers **secure and isolated workspaces accessible directly from a browser**, facilitating collaboration and ensuring compliance, **data protection** and effortless remote access without compromising performance.

SI DR

Secure Collaboration

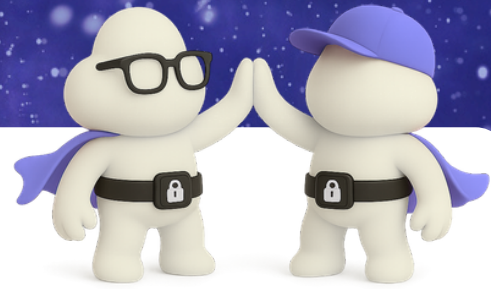

Reemo ThinClient

Reemo Thinclient transforms any computer into a lightweight, secure workstation dedicated for remote access, ensuring **centralized control**, **minimal local storage**, and **reduced administration overhead**.

Ultra-Restricted endpoints

Low-cost remote workstations

They trust us

france.tv

France TV needed a fast and reliable remote access solution enabling high-performance video editing by both creative and technical teams. Reemo provided 4K performance with near-zero latency, **allowing users to collaborate efficiently from anywhere**. During the 2024 Olympic Games, the weather presenter was able **to broadcast live and control in real-time complex animation softwares** remotely from a temporary studio near the Eiffel Tower, demonstrating the power and reliability of Reemo's remote access technology in high-pressure environments.
