EXPLORATORY

The exploratory functionality enables dynamic exploration of clinical data. With an intuitive interface, users can easily navigate through their datasets to discover trends and identify anomalies. This approach makes data analysis accessible and efficient, promoting meaningful discoveries.

REPORTING

The reporting functionality enables clear, detailed reports to be generated in just a few clicks. Interactive, customisable dashboards make it easy to analyse clinical data and help teams make informed decisions quickly. Whether for data reviews or medical monitoring, DAVIZI transforms your raw data into actionable information.

How does DAVIZI guarantee the **security of your data** ?

At DAVIZI, the security of your data is paramount. In a sector as sensitive as clinical research, we have put in place high-level security infrastructures and protocols to guarantee the confidentiality and integrity of your information. Our solutions are designed to meet the most stringent standards.

Comprehensive safety, with **certified expertise** at every level :

Hardware :

Our HDS-certified and ISO-compliant data center guarantee a sovereign and secure infrastructure. We comply with the GDPR and set up an independent architecture for each customer and project, as required.

Application :

The DAVIZI application is designed in accordance with the most stringent security standards, including ISO 27001/27002, the GDPR and ANSSI best practice. Regular cybersecurity audits reinforce this protection, while its independent architecture can be adapted to each customer, project or type of user as required.

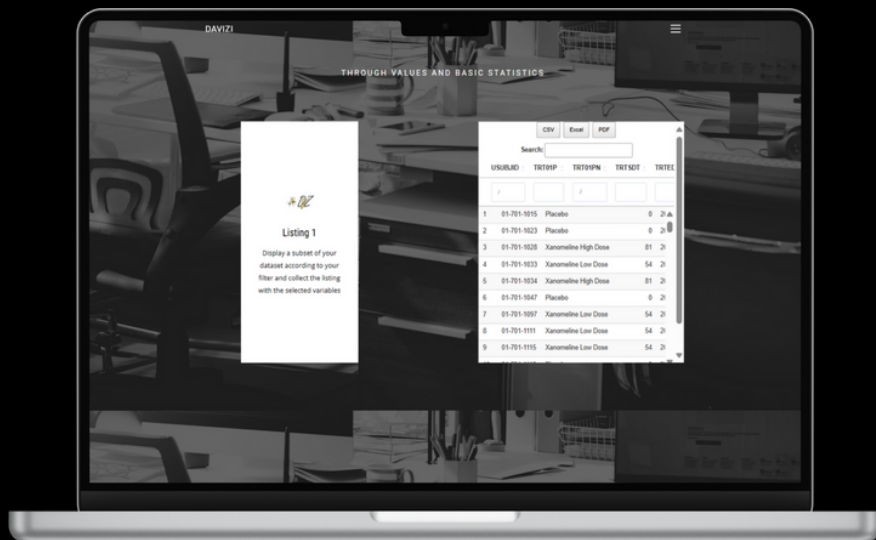

Company :

DAVIZI is fully committed to complying with the GDPR to guarantee the confidentiality and protection of its customers' data. A dedicated DPO (Data Protection Officer) constantly monitors compliance with security standards and regulatory compliance.
