CAMPUS

The future HUB of Science, Industry & Sovereign HPC in Greater Paris

Revitalization of Sanofi R&D facilities

Boost Campus is a unique site combining **fully equipped labs, industrial-scale facilities, and a future sovereign HPC & data center** to accelerate **Biotech, TechBio, Medtech, medical robotics, and health-AI innovation – from in silico to in vivo**

Key Highlights

- **Existing, ready-to-upgrade campus** Former Sanofi R&D site, engineered for pharma & life sciences, 16 ha, in the south of Greater Paris
- **Sovereign & compliant** : up to 20 MW IT load, HDS-certified storage + GPU-based HPC for AI/ML, digital twins, federated learning in health
- **28,000 sqm of fully equipped labs** (chemistry, biochemistry, pharmacology, vivarium) with L1/L2, fume hoods, specialised utilities and safety systems; units from ~190–300 sqm
- **Benches available** within the SandBox Labs with shared equipments
- **Future 60,000 sqm of production & industrial space** for scale-up (clean rooms, pilot lines, CDMO/bioprocess, robotics)
- **ESG-positive & low-carbon**: repurposed brownfield, EDF low-carbon power, waste-heat recovery to local district heating

PARIS SACLAY Communauté d'agglomération

CHILLY-MAZARIN

VILLE DE longjumeau

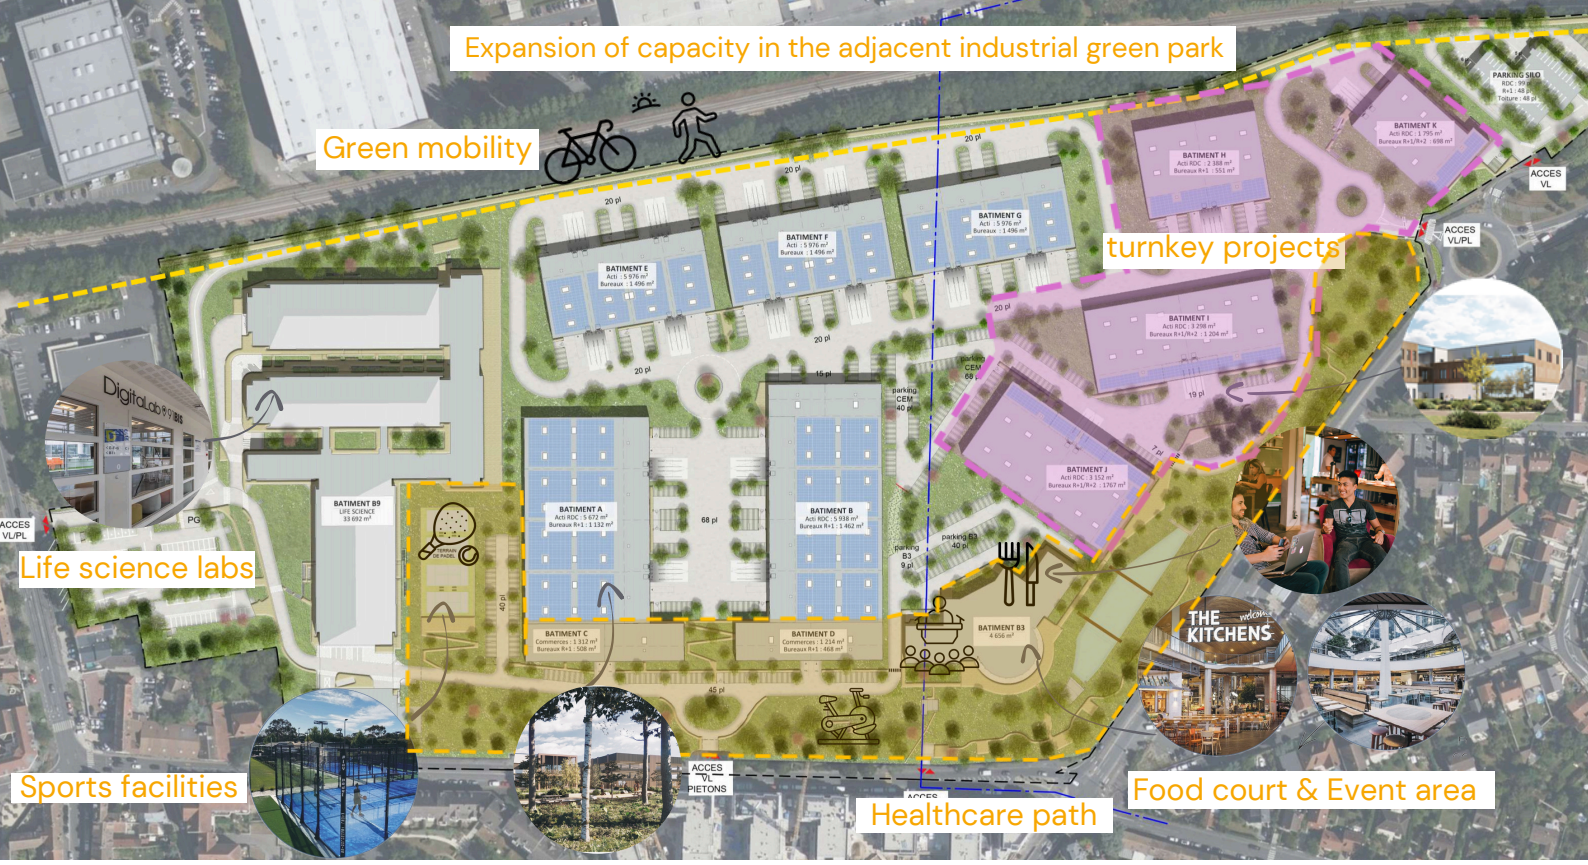

Over 60 000 sqm

- Of industrial scale-up facilities, available from 300 sqm, Q1 2028
- Bio-production unit
- Electronic & Medical Technologies factory
- Living Lab, Clean room

Excellent connections

Paris, Orly, Massy TGV hubs and the highways

Massy Palaiseau (RER B and TGV) in **7 min** by tramway T12
Paris Gare de Lyon in 35 min
A6 in 3 min
A 126 in 7 min
Orly airport in 12 min
Metro connection between M18 M14 in 2026
serving the Paris- Saclay Ecosystem

European sovereignty & compliance

- **Unique Wet Lab + Data + HPC** – Generate, store (HDS-compliant) and compute data on GPU HPC all on one site for faster prototyping
- **HPC & AI-ready for health & deeptech** – Supports Biotech, Medtech, robotics, imaging, digital twins, in silico trials, and AI process optimization
- **European data sovereignty & compliance** – HDS, ISO 27001, EHDS, AI Act; enables federated learning and secure cross-site collaboration
