Farming

The ideal tool to hot-punch holes in woven plastic mulch and any other plastic used for planting under film.

Precise flame control:
adapts to different materials

Ergonomic handle: optimized
user comfort

Optimal safety:
for the user
and the work
environment

Simplified maintenance:
the neck tube, nozzle and
trigger piezo igniter can
be removed without tools

**Gas cartridge mounted
on the handle:** total
freedom of movement

Durable: stainless-steel tube for long
service life, even in humid or saline
environments

**Interchangeable neck tube and
punch disc:** adaptable to different
crops or mulch types to perforate

Easy-to-change punch disc
with just a hex (Allen) key

Fast heat-up:
ideal for perforating woven plastic
mulches

High productivity
To meet the demands of
intensive market gardening

**Lightweight: 1.4 kg / 3.1 lb with
cartridge** Easy to handle, reduces
fatigue during long work sessions

Heat-up time: 2 minutes
Quick start to save time in the field

Runtime: approx. 2 hrs
Gas consumption:
166 g/h - 0.37 lb/h
