

ALL-PURPOSE TRAILERS

DIR MAMMUT

MAMMUT is an all-purpose trailer designed to carry agricultural tools. It can be connected to high-powered track-lying tractors without a three-point hitch. The frame, once the connection to the tractor has been made, prevents the latter from getting stuck or sliding. So maximum grip on the ground and minimum traction stress are ensured while the fuel consumption is reduced. Its unique structure also lets the weights partially unload on the wheel axis in order to improve their balancing during the transport.
