"A truer daily life, healthier, more natural"

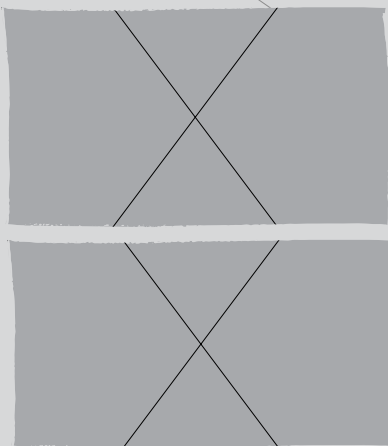

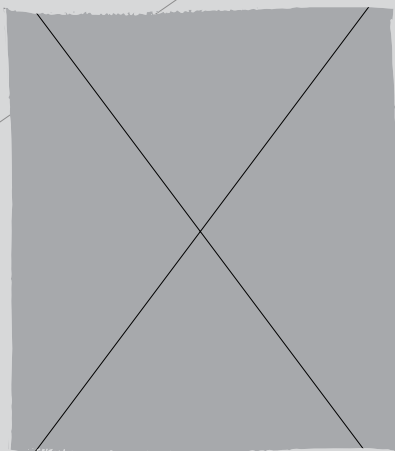

For over forty years, Mas du Roseau has been committed to reinventing the art of natural living.

Founded in 1983, our company was born in a Provençal farmhouse bordered by reeds and bathed in the scents of the garrigue. It is from this Mediterranean land, rich in traditions and light, that we draw our inspiration.

From the very beginning, our intention has been clear: to offer simple products, crafted by hand, with a list of ingredients reduced to the essentials. No artifices, no superfluous elements: only the best of nature, serving the body, the home, and everyday life.

Our soaps, care products, and fragrances tell a story: one of roots in Provence, a love of plants and local raw materials, and a constant search for balance between effectiveness and respect for the planet.

Choosing Mas du Roseau is much more than a daily gesture. It is to embrace a way of life: authentic, responsible, and deeply human.

Our convictions and commitments ...

For over forty years, Mas du Roseau has combined craftsmanship, efficiency, and responsibility. Because every action counts, we act every day to preserve and respect nature.

Responsible raw materials

We favor RSPO-certified palm oil, sourced from sustainable plantations that respect forests, biodiversity, and local communities.

Actions for the environment

1% of the turnover from the LIBRE range is donated to associations, and we support ASPAS to protect wildlife in France.

Exemplary management of water

In our workshop, every drop counts: machines cleaned without water, dry garden, concentrated formulas, and advice for moderate use.

Water is a precious resource that we must preserve. At Mas du Roseau, we have long since rethought our practices: machines cleaned without water, a dry garden around the workshop, and regular checks of installations to avoid losing a single drop.

Our watchword: economy, from the design of our products to their use.

But preserving water also means seeking the right balance. We know there is no miracle solution: replacing one material with another is not enough. What matters is choosing the right sectors and acting with discernment, as shown by our commitment to the RSPO sector.

A family-run and artisanal business, we work every day for "a more genuine, healthier, more natural daily life."

Our products are simple, effective, and respectful, designed to meet your needs without excess, with a list of ingredients reduced to the essentials.

Our workshop of production

At Mas du Roseau, every product is born in our workshop in Saint-Chamas, in the heart of Provence.

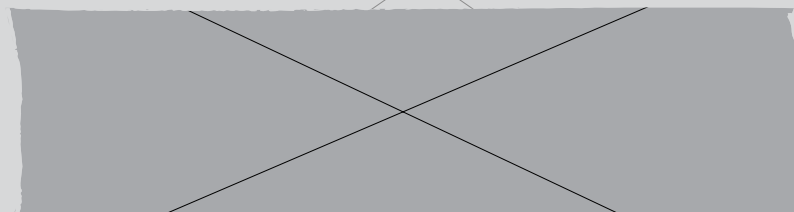

At Mas du Roseau, every product is conceived and made with high standards, sincerity, and respect for nature.

In our workshop in Saint-Chamas, Provence, we claim 100% artisanal know-how, where every stage of production is designed to combine efficiency, naturalness, and environmental responsibility.

Our formulations are created in-

house, with local ingredients, plants, and fragrances from Provence chosen for their gentleness and low allergen content.

We favor plant-based oils and colorants, and 80% of our raw materials and packaging come from France, promoting short supply chains and local partnerships.

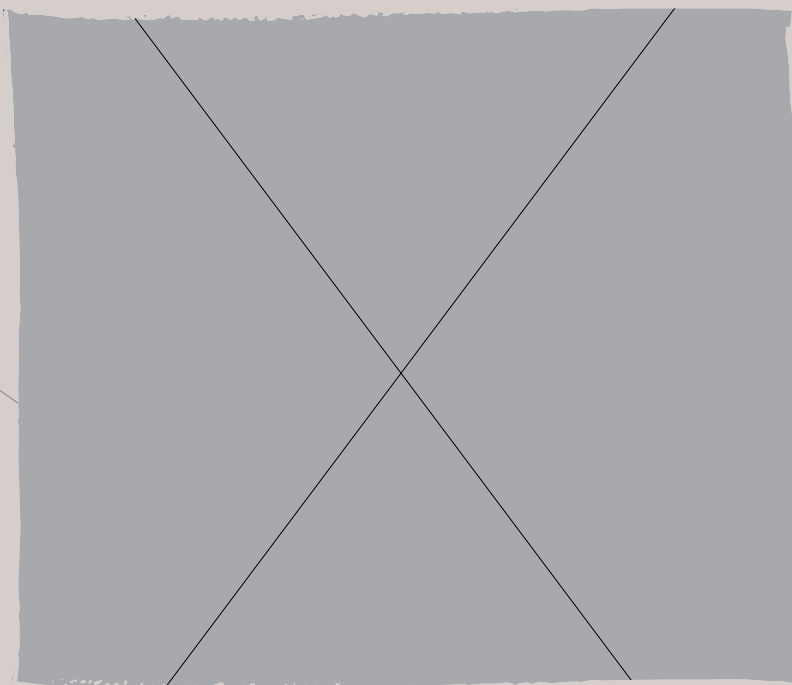

When it comes to packaging, we cut out the unnecessary

Our products are offered in glass bottles, recyclable plastic, or in bulk, and we encourage their reuse.

Every day, our actions reflect our commitment: machines cleaned without water, a dry garden around the workshop, and responsible resource management. We regularly revisit our formulas to ensure quality, ethics, and sustainability.

Our belief is simple: effectiveness is not measured by power, but by accuracy. Cosmetics and cleaning products that are simple, healthy, and respectful of the planet—that is our signature.

THE CONCEPT OF CANDLE PEARLS

BAG OF CANDLE PEARLS TO SCENT OR NOT

400 g.

With wicks. To scent or use as is.

Packing: 6
Ref: 90.1.81
Price: €5.97

With a touch of magic, and a hint of madness, create your universe, the reflection of your life, recycle, reinvent, let beauty blossom ... In a bowl, in a cup or even in a small glass, create your ephemeral decoration.

USE:

- In a heat-resistant container, place a candle wick
- Fill the container by pouring in the candle pearls while making sure the wick stays upright.
- Cut the wick so that it is about 1cm high from the surface of the wax (be careful, a wick that is too long can cause a flame that is too high). Your candle is finally ready.
- If you wish, you can add a few drops of one of our fragrances to your wax pearl candles. Repeat this step when the scent fades.

The pond is an image of our unconscious, where the crayfish symbolizes our memories and all the things buried in our personal night.

The Star is an image of the future and of peace. It is the sweetness of life, trust in life, and letting oneself be guided by intuition. The Star gives without restraint and allows itself to be seen without disguise.

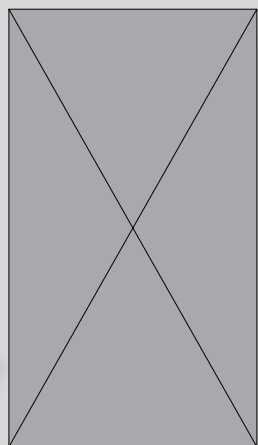

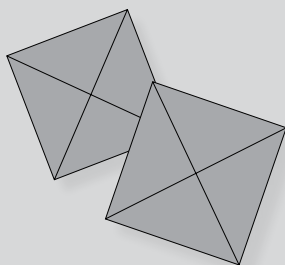

It is a representation of truth, a desire to show oneself transparently, vulnerably...

One day, inspired by the whisper of the wind and the muffled
laughter of the absent, he created a small hanging candle
holder, capable of capturing invisible presences.*

CUSTOMIZATION

How does it work?

*Would you like a collection in your image?
We create, with you, a unique product that highlights your
establishment, your region, or a special event.*

1 – Choose your medium

Select the product(s) you wish to customize (List of customizable media on the next page). Our team can guide you according to your needs and target audience.

OPTION 1

We create your visual from A to Z based on your ideas, sketches, or inspirations.

Graphic design fees

180€ / visual

This involves sending us a photo, a drawing, a sketch, etc... as close as possible to what you want to see in the final result. In this option, please inform us of:

- The desired style (pastel, colorful, vintage, realistic, etc.)
- Logo and typography if you want them to appear on the label
- Main and secondary colors, and those to avoid
- Given the size of the label, please do not multiply the major/iconic elements you wish to appear on the label. You risk losing visibility. We recommend a maximum of 3 elements.

2 – Choose your package

Three options tailored to your projects:
From simple adaptation to complete creation, you decide the level of customization.

OPTION 2

You give us a visual and we adapt it to your packaging.

Graphic design fees

75€ / visual

This consists of a royalty-free visual or one you own, used as is by our creative studio.

OPTION 3

You design the entire layout and send it to us.

Regulatory validation fees

30€

If you wish to design the label on your side, we will send you the labeling guide as well as the label die-cut.

3 – We create a visual proposal

After receiving your brief or your elements (logo, colors, text...), we prepare a mockup for approval before production.

4 – Production & delivery

Once the visual is approved, your personalized products go into production.

PLEASE NOTE FOR ANY REQUEST FOR CUSTOMIZATION OPTION 1 AND 2

We need the following information:

- Desired position of the elements on the facing
- Language
- Your brand name (visible or not)
- Fragrance name (visible or not)

Any approval of the quote is considered a commitment on your part. In case of cancellation, graphic design fees will be charged. The rates mentioned above for graphic design fees are provided for information only. Our priority is to guarantee your optimal satisfaction by offering you a unique and high-quality visual. However, if the initial scope is exceeded, we reserve the right to apply additional charges beyond 5 revisions. You will be informed in advance of any possible extra costs.

Bulk

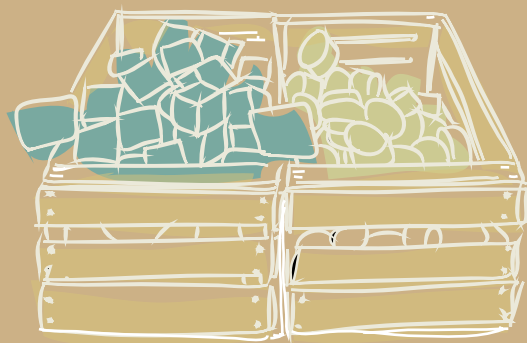

Designed to consume better and more simply, our bulk offer allows you to adopt responsible habits without giving up pleasure. Generous, practical, and sustainable formats to fill, refill, and use at your own pace, while limiting the unnecessary.

Our environment! It is one of our main concerns...

This is why we are pleased to announce our partnership with the Association for the Protection of Wild Animals (ASPAS). 2% of the turnover from the BULK range will be donated to them.

ASPAS works for the protection of wildlife, which is recognized as 100% of public utility and is independent.

Thanks to it: Wildlife reserves are created in France. The voiceless of wildlife such as foxes, crows, amphibians, badgers... are defended. Efforts are made to reduce nuisances (pollution, pesticides) that affect natural environments and human health.
