Vacway

TECH IT SIMPLE

MODERNIZE YOUR MUSEUM

Enhance the Visitor Experience

www.vacway.com

1. What challenges do museums face today?

Challenges

What are we facing?

- Long queues at entrances and ticket counters
- Slow and manual processes
- **Lack of digitalization**
- Limited storage space
- **High operational costs**
- Security risks and low visitor satisfaction
- **Unmonetized services that represent ongoing operational costs**

2025

How does it affect?

- Lower perceived quality
- Loss of revenue (weak online sales)
- Higher personnel costs
- Logistical and security issues

VACWAY

What is it?

We are a technology partner and service provider with strong development and production capabilities thanks to creating our own technology. We design and manufacture vending systems ranging from automated lockers to self-service kiosks.

3. VACWAYlockers

Technology that transforms your museum

Touch keyboard

VACWAYlockers

Innovative fully automated locker management and rental system designed for museums with high visitor traffic. It replaces traditional cloakrooms with smart lockers featuring software tailored to your operations, enhancing security and providing a smoother experience for visitors.

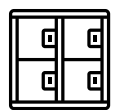

A software designed to adapt to you: flexible, scalable, and fully customizable according to your museum's needs.

Why VACWAYlockers?

Vacway Lockers is the ideal solution to modernize storage management in museums by completely eliminating manual processes in lockers and cloakrooms. Its automated system not only enhances the visitor experience, making it faster and more convenient, but also enables

Additional revenue generation through locker rentals. Furthermore, it provides increased security by minimizing the risk of loss or theft, and ensures an accessible experience for all visitors thanks to its multilingual interface and integrated voice guidance.

Functioning modes

Designed to reduce queues and operational times, our quick access system allows fast and secure entry. After purchase, visitors can manage access to their belongings independently by simply entering their PIN on the locker instead of at the point of sale very different from other solutions on the market, allowing them to focus solely on enjoying the experience.

Mode #1 Per day

Allows the customer to open the locker as many times as they want within 24 hours.

RECOMMENDED

Mode #2 Per hour

Allows the customer to open the locker as many times as they want during the rental period.

Mode #3 Per opening

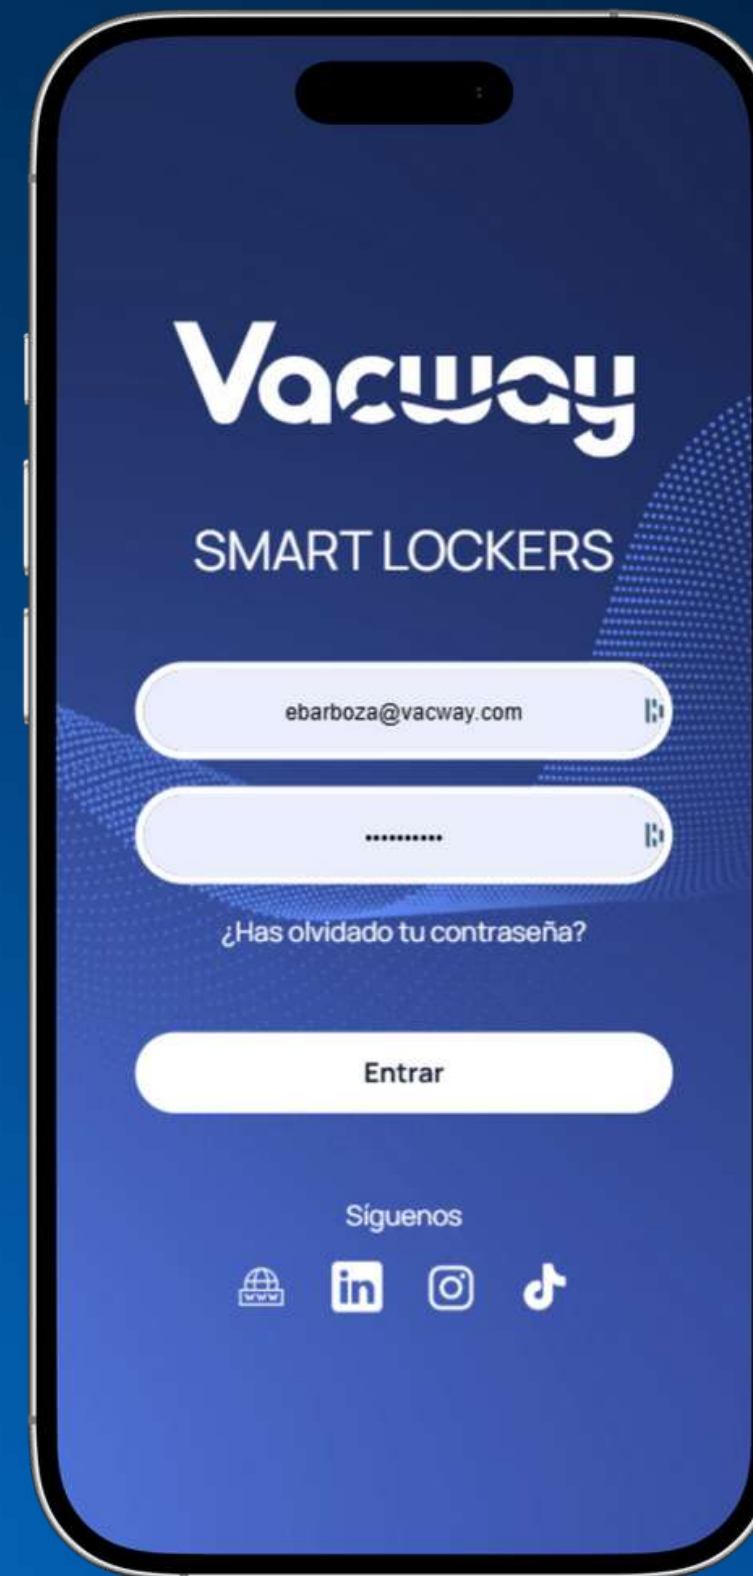

Allows the locker to be opened once for each payment made.

Speed up self-management with QR code

Your customers no longer have to go through the payment booth to reserve their lockers. Now, using our QR code, they can self-manage and pay for this service directly from their own mobile devices. No lines and 100% automatic!

At the end of the online purchase process, they will have the locker number and PIN code on their mobile device, along with additional information about the purchase.

TRY IT YOURSELF

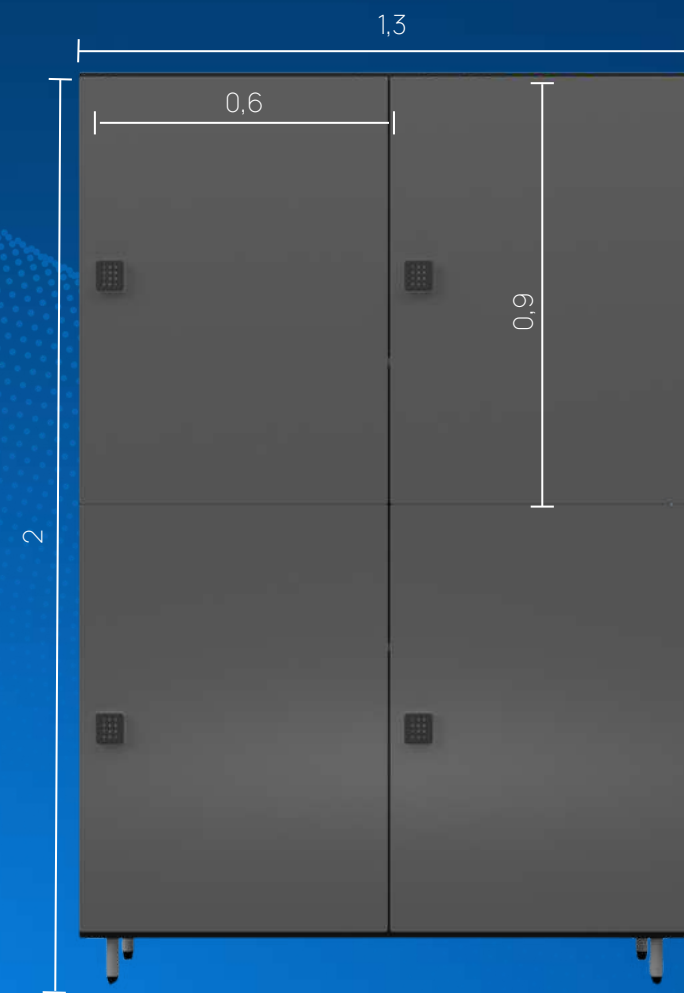

Choose different sizes

2025

You can choose the locker size that best suits your needs and even combine different sizes within the same locker unit.

13.

The most complete and autonomous solution on the market

for locker management in amusement, theme and water parks.

DYNAMIC SEASONAL PRICING

Set custom rates based on demand, key dates, or peak seasons, strategically and automatically maximizing revenue.

QUICK ACCESS SYSTEM

Unlike other systems that require users to return to the terminal each time they access the locker, our quick access system allows them to open the locker directly using a dedicated keypad for each unit. Greater convenience, less waiting, and a simplified user experience

PRE- SALE

Your customers will be able to book their lockers in advance directly from your website, ensuring convenience and easy planning

The most complete and autonomous solution on the market

for locker management in amusement, theme and water parks.

REAL-TIME SALES REPORT

Track your sales and view revenue by channel cash, card, or online payment in real time. Manage all your transactions from a centralized platform for simplified and efficient control.

QR CODE

Customers can manage and pay for the service directly from their smartphone via a QR code. The process is 100% automated and there's no waiting.

And on top of that... design them however you want!

We design and customize the locker sizes according to your needs. You can choose the finish, design, and material you want: metal structure, or stainless steel, with phenolic doors.

Other interior material options include water-resistant CDF and MDF.

Both are available in basic finish (without vinyl or image) and premium finish (vinyl wrapped with your logo or desired image).
