The universal support for dispensers

Made of stainless steel, the support provides excellent stability for a bottle-top dispenser.
A PP clamp holds the instrument securely in place when attached to a small bottle.
The support is compatible with any Calibrex™ models, as well as most other brands of dispensers.
Can be transformed into a remote aspiration system.

- Universal fit
- Flexible in use
- Sleek design with high robustness
- Perfect match with remote aspiration kit

AVAILABLE FORM STOCK!

Remote aspiration kit

Adding a second clamp turns the support into a remote aspiration system. The dispenser remains stable when connected to a long tubing to draw liquid from a remote container (max. 10 m distance, 2 m elevation).
The kit ensures stability and secure tubing connection for safe dispensing.
