

HAVE YOU EVER READ THE LABEL ON YOUR DOG'S SNACKS?

We did, and honestly it's difficult to believe what's in there. Half the ingredients you can't even pronounce, weird additives. And somehow they all claim to be "natural and high in proteins". But have you noticed the smell?

That's exactly why we started **Oscar's Favourites**.

To create snacks that are simple and real, with ingredients that actually make sense for your dog's diet. No confusion, no complications. Just what nature intended.

Here's the thing –

Dogs are built for meat. That's what they need to thrive. And that's what we are committed to offer.

Freeze-Dried & Raw

We only use real raw ingredients — meaty bones, organs, and muscle meat — freeze-dried to lock in nutrients.

Minimal process

We cut, prep, and pack by hand — no factories, just real care in every bite.

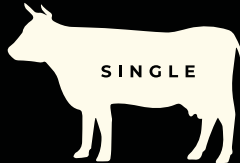

Vun Hei

We sourced and produced everything here, in Luxembourg.

BECAUSE YOUR PUP DESERVES BETTER

Simple. Nutritious. and Delicious. One Ingredient at the time

NOT SURE IF YOUR DOG'S INTO IT?

Here's how to serve it right

01 Start by offering your dog a small piece of the snack to let them get used to the flavor. If they enjoy it, you can give them the whole piece.

02 If your dog seems unsure, **try moistening the snack a bit** to bring back its original texture and flavor.

03 If that still doesn't work, you can **crush the snack into a powder** and sprinkle it on their regular food as a topper.
