GARMENT
INDUSTRY

“Fazman Tekstil” LLC was founded
in 2000 by the Fatkhiddinov family.

ABOUT COMPANY

Since 1993, three brothers
have been working
in the suitwear industry.

Currently, the land area of the enterprise is 12 hectares, and the size of the production area has reached 45,000 m².

“Fazman Tekstil” LLC produces 300,000 Blazers, 400,000 Classic trousers, 190,000 Chino trousers, 165,000 Vests, 190,000 Shirts, 50,000 Coats and Jackets per year.

Since its establishment, “Fazman Tekstil” LLC has been keeping up with the latest innovations and new technologies in the world.

Currently, the world’s most advanced equipment and technologies such as Bullmer, Durkopp Adler, Pfaff, Brisay, A-S-S, Strobel, Juki supplied by Germany and Japan are used.

The purpose of the enterprise is not only to bring Uzbekistan up to the world market with its products, but also to reach higher levels in the world in terms of quality.

For this purpose, the company has been actively exporting its products to the CIS countries, Europe and America since 2002. European and American brands which have high positions in the world market are among the companies being exported.

GARMENT INDUSTRY

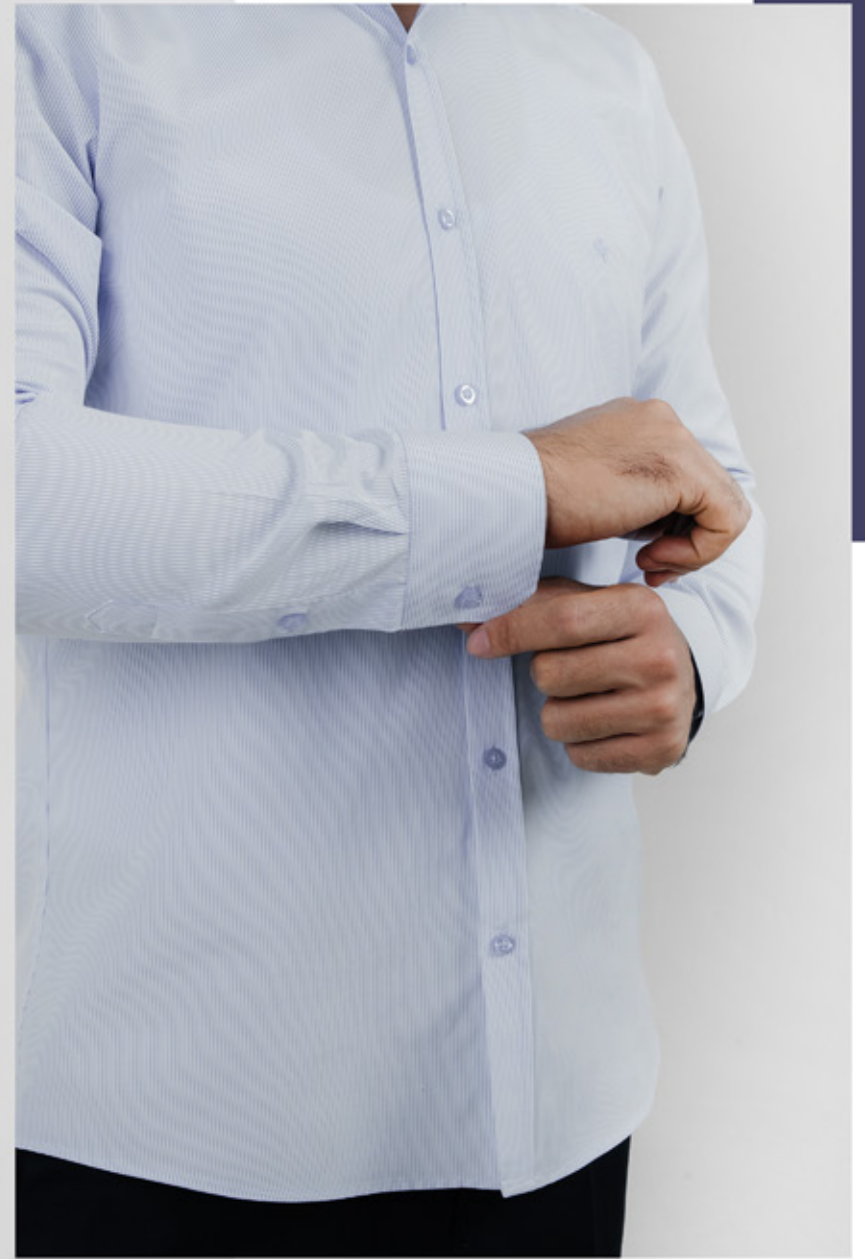

Fazman Tekstil LLC operates its own fleet of trucks equipped with hanger systems for garment transport. Each truck has the capacity to carry approximately 4,500 blazers and 4,500 trousers on hangers. All trucks are equipped with a special GPS system, which allows our customers to easily track the location of the truck in real time. Since 2020, we have been using our own trucks to deliver goods directly to our partners across Europe, ensuring safe, timely, and efficient transportation of finished garments.

Our company is registered in the REX system under the preferential scheme GSP+. This allows European brands to import products manufactured in our factory duty-free, provided that the main fabric originates from the EU or Turkey. Thus, our partners receive a noticeable reduction in import costs.

Our company holds certifications including SEDEX,
ISO 9001 (Quality Management),
ISO 14001 (Environmental Management),
and ISO 45001 (Occupational Health and Safety),
reflecting our commitment to international standards in responsible production.
