

Texcelle

- > Create beautiful carpet, tuft and printed designs.
 - > Draw freehand from scratch, edit existing designs, or manipulate scanned images.
 - > Create color books, recolor patterns, and work with scales, repeats, gradients, and motif layers.
 - > Utilize various color standard systems.
- Save time and sample costs with product simulations.

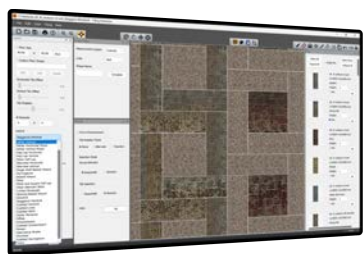

Tuft

- > Create and manage the structure of any tuft or carpet design.
- > Receive immediate notifications of any errors or inconsistencies.
- > Assign yarns to needles and specify the high-low pattern, applying CAM step motion.
- > Achieve time and cost savings with high-quality simulations and recoloring using yarn books.
- > Produce production output files for a wide variety of tufting machines.

Tiling

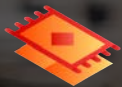

- > Create tiled floor layouts with a wide range of tile layout options, colors, and patterns.
- > Ideal for carpeted, ceramic, porcelain, marble, luxury vinyl tile (LVT), and hardwood flooring.
- > View your tile layouts in the ultra-realistic room scenes and adjust tile positions with a click.
- > Combine carpet & wood planks in one layout.
- > Calculate the tile usage in square meters (m²) or square feet (ft²).

True Coloring

- > Recolor visualizations of simulated products using yarn books or color palettes.
- > Work with multiple patterns simultaneously.
- > Create your own templates to print custom-made virtual samples.
- > Recolor texture simulations made with NedGraphics Texcelle.

TEXTILE DESIGN SOFTWARE For **Carpets and Rugs**

NEDGRAPHICS
INSPIRING CREATIVITY

Create and color beautiful carpets and rugs using the wide range of NedGraphics software solutions, such as **Texcelle, Tuft, Tiling, and True Coloring**. These tools enable realistic simulations and virtual sampling, enhancing the design process.

■ Specialized design software for:

 **Creative Carpet
& Tuft Design**

 **Color Selection
& Management**

 **Tiling Layouts**

 **Visualization**

 **Printed Flooring**

■ The NedGraphics advantage:

- Accelerated Workflow
- Elimination of Errors
- Color replication and Consistency
- Reduction in Sampling Cycles
- Production-Ready Design Files
- Impressive Time and Cost Savings
