Automat-it

40 FREE Hours
From a Senior AI Engineer

Get 1 AI capability built in your AWS account
No slide decks. No empty consulting. Just real, hands-on work.

40	1	$0	Yours
Hours of senior AI engineering	**AI capability** built for you	**Zero cost** to you	**You own it** in your AWS account

AI workloads can get stuck in the pilot stage when your team is at capacity.
Let Automat-it's experts create working code in your account so you can ship faster.

Choose From Six Capabilities. We Build One For You

Claude Code on Bedrock
Secure AI apps with guardrails and developer tooling.

Fine-Tuning on SageMaker
Customize foundation models on your own data.

RAG & AI Knowledge Bases
An assistant that answers from your own docs.

Prompt & Context Optimization
More accurate, consistent GenAI output.

NLP-to-SQL
Query databases in plain language, no SQL.

Voice-to-Text Pipelines
Turn calls and audio into searchable insight.

From Scoping to Shipped in 3 Steps

1 **Scope**
Pick the capability on a short call. The clock starts only when scope is locked.

▶

2 **We build**
A senior AWS & GenAI engineer ships working code in your AWS account.

▶

3 **You own it**
Your team owns the capability from day one — no lock-in, no slide deck

Turn your AI ideas into reality at zero cost

Offer valid for customers with a minimum $20,000/month AWS spend (MRR), excluding Marketplace.
