OUR 3 EXPERTISES AREAS

33
Injection molding machine from 50 to 580T

- Injection of parts for the packaging
- Medium and large deries
- High performance mold
- Multi-cavity molds
- Commodity materials
- Bi-material injection

17M€

hyléance Pack

37
Injection molding machine from 50 to 450T

- Injection of parts & technical materials
- Assembly
- Decoration
- Overmoulding
- Gas injection
- Small/large series & dimensions

16M€

hyléance Tech

12M€

hyléance Soufflage

23
Blow molding machines

- Including 1 multi-layer co-extruder (100T)
- Technical parts from 500 ml to 300 L
  Bottles from 50 ml to 10L

hyléance Pack

BUSINESS EXPERTISES

- High performance and multi cavities molds
- Medium and larges series
- High-precision assembly
- Environment BRCGS Packaging Materials Standard
- Food and cosmetic contact materials
- Environmental impact support
- Packaging design

PRODUCTS EXPERTISES

- Sealing
- Dosing
- Inviolability
- Refillability
- Recyclability

hyléance Tech

BUSINESS EXPERTISES

- Injection of small and medium series
- Over molding
- Assembly
- Decoration
- IML
- Gas Injection

PRODUCTS EXPERTISES

- Multi-components parts
- Injection of technical materials
- Resistance parts
- Parts with very high dimensional requirements
- Development of special multi-purpose machines

hyléance Soufflage

BUSINESS EXPERTISES

- Blow extrusion
- Coextrusion
- Versatility in processed materials
- Multi-cavities molds
- Sealing
- Filling and heat sealing

PRODUCTS EXPERTISES

- Large parts
- Watertight tanks
- Bottles
- Multilayer parts

NEWS for 2026

hyléance Soufflage

Construction of a 3,340 m² storage building

A multi-layer co-extruder
Up to 70 per cent post-consumer recycled (PCR) material can be incorporated in certain applications.

Establishment of a production hall entirely dedicated to **bottling machines**

NEWS for 2026

hyléance Pack

A new ARBURG 50 T injection moulding machine.

hyléance Tech

A new DEMAG 130T injection moulding machine fitted with a WITTMANN robot

SPECIFIC CASE OF HYLEC USE

hylEC
The potential carbon footprint of your project

Product : our refillable pack puRe Twist

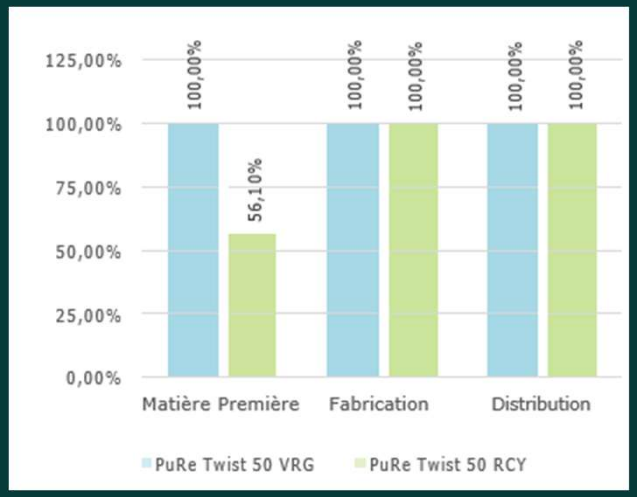

Here we compare the carbon footprint of 1 pack of puRe Twist 50g in virgin material **VS** *1 pack of puRe Twist 50g with recycled material*

HYLEC DEMONSTRATES THAT:

We're saving money

54 002 km

distance travelled by car per 100,000 packs with the RECYCLED pack

puRe Twist 50g with VIRGIN material

Multi-piece packaging:
4 parts made from virgin PP and 1 made from RPET.

Total weight = 37.1g

puRe Twist 50g with RECYCLED material

Multi-piece packaging:
4 parts made from PCR rPP and 1 piece made from RPET.

Total weight = 37.1g
