Nutrabiol® Grapeseed

Nutrabiol® Grapeseed is a **premium European grape seed extract** standardized to 70% oligomeric proanthocyanidins (OPCs) by HPLC. Rich in highly bioavailable polyphenols, it delivers strong antioxidant protection while supporting cardiovascular and metabolic health.

Sustainably sourced from wine industry by-products and produced through an eco-friendly aqueous process, it is a **high-quality, clean-label solution for advanced nutraceutical and functional formulations**.

MAIN FEATURES

- 70% OPC (HPLC) for high potency and consistent efficacy
- Highly bioavailable antioxidant compounds
- Supports cardiovascular and metabolic health
- Helps protect against oxidative stress and aging
- Clinically supported ingredient
- Sustainable and upcycled origin
- Clean-label: non-GMO, vegan, gluten-free
- Eco-friendly aqueous extraction

APPLICATIONS

- Dietary supplements (capsules, tablets, softgels)
- Functional foods and beverages
- Healthy aging formulations
- Cardiovascular health products
- Metabolic health and blood sugar support
- Gut health and microbiota-targeted solutions
- Beauty-from-within and nutricosmetics

PROPERTIES*			APPLICATIONS (non-exhaustive)*								
ANTI-OXIDANT	ANTI-FREE RADICAL	ANTI-INFLAMMATORY	ANTI-AGING	COGNITIVE HEALTH	CARDIO-VASCULAR HEALTH	JOINT HEALTH	DIGESTIVE HEALTH (prebiotic effect)	SPORTS NUTRITION (performance recovery)	WEIGHT MANAGEMENT	EYE HEALTH	SKIN HEALTH

Why choose Nutrabiol® Grapeseed?

Nutrabiol® Grapeseed provides a concentrated source of oligomeric proanthocyanidins (OPCs), small polyphenols with superior absorption and proven biological activity.

Its standardized profile ensures high efficacy and consistency, with scientific evidence supporting **benefits in cardiovascular health, metabolic balance, and oxidative stress reduction**. Emerging research also highlights its potential in gut health and healthy aging applications.

Health Benefits of White Grape Seed Extract (OPCs)

- **Antioxidant protection**[1]
  - Reduces oxidative stress and lipid peroxidation
  - Supports cellular and mitochondrial health
- **Cardiovascular support**[3,4]
  - Improves blood pressure and vascular function
  - Enhances microcirculation and endothelial health
  - Supports lipid profile balance
- **Metabolic health**[5]
  - Improves glucose and lipid markers
  - Supports insulin sensitivity and inflammation control
- **Microcirculation & skin health**[1]
  - Strengthens collagen and elastin
  - Improves capillary integrity and skin vitality
- **Gut health support**[6,7]
  - Modulates microbiota balance
  - Supports intestinal health
- **Liver health support**[8,9]
  - Supports hepatic function and metabolic balance
  - Reduces oxidative stress markers
- **Neuroprotective potential**[1]
  - Supports cellular protection and anti-inflammatory activity
