

A team at your service

The AGRISEM service means being close to you !

Every day, we work to better **support you, anticipate your needs and simplify your work** thanks to increasingly innovative machines. From design to marketing, our teams constantly **strive to develop tailor-made tools** for our customers.

Mutual trust and shared values, this is how we see our collaboration.

Listening, advice and availability, the AGRISEM service means benefiting at all times from the expertise of a strong network and skilled technicians.

The Agriculture

of

Tomorrow...

Let nature have the power to do the job !
Composed of a team of passionate people AGRISEM is committed to **more responsible and environmentally friendly agriculture**.

Our vocation is to **improve your daily life** by developing **more efficient and economical machines**.

Nature is our greatest ally to **think, create, nurture and succeed**.

Together, let's look to the future and anticipate the challenges ahead to **build the world of Tomorrow**.

Agrisem Spirit

AGRISEM is a company born in France in the mid-1990s, specialized in the **design, manufacture and sale of TCS tools for tillage, fertilization and sowing**.

Moreover, the STRIPCAT striptill and BOSS direct seed drills, developed in the southwest of France by a farmer to meet his economic, agronomic and ecological needs, are now marketed by AGRISEM.

To maintain this spirit of farmer-driven innovation, the company has set up a dedicated support team, ensuring that products continuously evolve to meet the challenges of the sector.

Our goal is to help farmers get the most out of his most important tool : the soil.

AGRISEM's main innovations revolve around key objectives :

- **Surface work** to manage organic matter, soil fertility and seedbed preparation, embodied in the MULCH range.
- **Deep loosening** to achieve optimal soil structure, without mineral loss, providing plants with ideal growing conditions : it's the POLW range.
- **Precision sowing** to plant crops under the best conditions and fertilize with maximum accuracy using versatile tools : the SEM range.
- **Minimum tillage and conservation farming**, aiming for more sustainable solutions that preserve natural resources : it's the range Conservation Farming.
- Viticulture adaptation, applying AGRISEM's expertise in tillage and seeding to vineyards : the VINE

A solution to every need

Top Soil Management

Turbomulch
Turbomulch EXTRA

FACA Roller
Pack Roller

The **Turbomulch** range is a straw harrow that ensures fast weed emergence, spreads residues and promotes their decomposition.

PACK Roller & FACA Roller are designed for soil consolidation and the destruction of intercrop or crop residues.

Tillage

Disc-O-Mulch Série R
Disc-O-Mulch Gold
Disc-O-Mulch EXTRA

Vibromulch
Smartplow mix
Maximulch

Vibromulch is ideal for stubble breaking, shallow mixing and scalping. This highly versatile tool ensures efficient and economical operations.

Disc-O-Mulch serie R provides a high-performance & cost-effective stubble-breaking. Its aggressive discs and reliable release system ensure quality shallow cultivation with low power requirements.

Seeding

BOSS
Vibrosem
DSF / DSA

BOSS HD
T-BOSS
DLF

BOSS is a versatile min-till/no-till disc seeder with powerful pressure, precise depth control and effective closing for optimal seeding performance.

BOSS HD is the reference no-till seeder with inclined disc, unisuring reliable direct seeding in all conditions.

Row Crops

Stripcat
Chief
REX

Fertill
Scalp
Flex

STRIPCAT is designed for strip-till operations, with multiple configurations allowing fertilization and seeding in a single pass.

CHIEF is a high-tech precision planter that gives each plant the best possible start.

Fissuring

Combiplow
Cultiplow
Smartplow

Fissuring is an important field operation. AGRISEM's patented blade design enables deep fissuring, without mixing the soil horizons.

Smartplow is an implement designed for mid-depth and shallow soil cracking without disturbance. It ensures quality crop establishment with reduced operating costs.

Disc-O-Mulch Gold is an independent disc stubble ploughing that meets high-performance standards. Its excellent penetration capacity in dry conditions and efficient residue mixing makes all the difference.

Vibrosem is a simple, low-power min-till/no-till tine seeder that performs efficiently in almost every weather conditions.

T-BOSS is a no-till tine seeder offering precise seed placement and excellent furrow packing, providing the best conditions for crop establishment.

FERTILL maximizes fertilizer performance by optimizing nutrient efficiency.

SCALP helps extend the limits of mechanical weeding.

Cultiplow is a standalone soil-loosener with a unique concept : offset-tipped blades, ensuring optimal cracking across the entire width.

Combiplow is a combinable soil-loosener designed to be positioned between the tractor and implements such as a seeding combination, power harrow or tiller.

Smartplow mix is a tine cultivator designed for deep residue mixing and stubble breaking.

Maximulch combines the functions of a soil-loosener, tine cultivator and stubble-breaker, performing all shallow and deep soil preparations in a single pass.

DSF is a front hopper with multiple combination possibilities, allowing seeding and localized fertilization throughout the year.

DLF is a front tank for liquid fertilization, helping crops by delivering the right amount of nutrients at the right place and time.

Vineyard

Combivigne
Cultivigne

Disc-O-Vigne
Vibrosem Viti

Disc-O-Vigne benefits from AGRISEM's experience in soil mulching, offering efficient inter-row and covercrop management.

Vibrosem viti ensures precise seed placement for successful establishment and optimal agronomic benefits of cover crops.
