120605 / 120606

Galvanised insemination door

120607

Galvanised comfort compartment only (without rear door)

120618

Master laying prevention support

HEAD RAISER

Head raiser made from steel tube and covered with a soft touch material for less aggressive contact with the animal. It provides secure support for the animal's head and minimises stress during handling. It is height adjustable to suit cattle of all breeds and sizes.

PARTITION

On all Andrieu restraint cages, each side features: 2 wicket gates in the lower section opening independently horizontally and 1 large door in the upper section (comprising 2 independent tilting and pivoting gates allowing access to the animal's belly or back)

INSEMINATION DOOR

Our double insemination swing door provides easy access for safe operations on the rear of the cattle.

ARGUMENTS COMMON TO ALL OUR RESTRAINT CAGES

- Robust, heavy and silent cages
- The restraint cages are width adjustable, from 430 mm to 842 mm.
- Soundproof rubber mat with high-quality non-slip reinforcement
- Anti-backing bars
- Our weighing kits allow to switch to legal metrology.

CONTACT US

for your restraint projects

For 40 years, Andrieu has been renowned for its expertise and quality equipment designed for breeders as well as cattle professionals (trade). Andrieu, manufacturer of restraint equipment based in the Aveyron area of France with 45 years' equipment experience joined the Agritubel group in 2018. The experience of these two market-leading companies has allowed them to innovate in the market for cattle and sheep restraint equipment.

A commitment to user safety and animal welfare

Our equipment is designed to perfectly adapt to the restraint standards. Our products are equally designed for both cattle and sheep professionals and breeders.

Innovating by combining creativity and robustness for your safety

Our design office qualified in breeding standards is constantly working to design products that meet users' needs. Our aim is to develop innovating products that allow you to move in your work area safely while keeping your animals safe too. Our products are developed jointly with our partners, who are users, but also technicians specialised in cattle restraint standards and techniques.
