

ThinkCities®

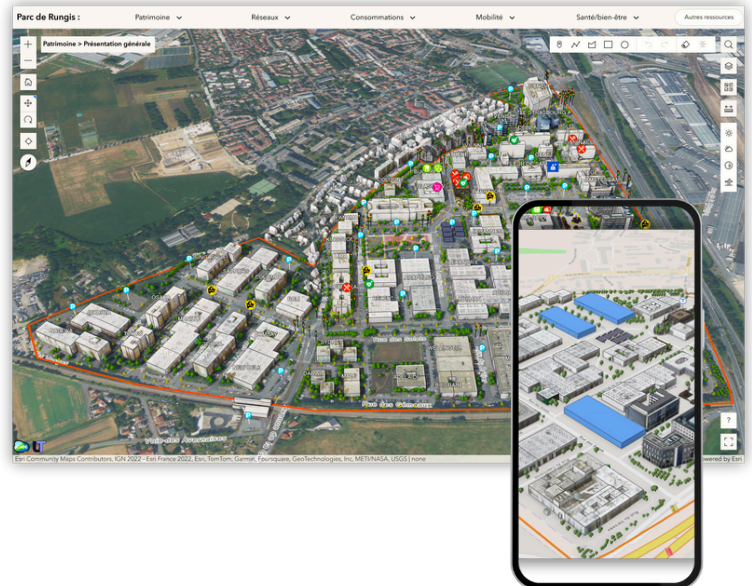

UrbanThinkPlatform

1st territorial geodecision service

The European Union aims to **achieve carbon neutrality by 2050**, as part of the **European Green Deal**. Local authorities and developers play a key role in reaching this goal. **ThinkCities®** is an **innovative solution** designed to **identify, measure, and monitor environmental performance** across your area of responsibility.

What is ThinkCities®?

ThinkCities® provides a **systemic assessment** of your project's alignment with **ecological and energy transition goals**, across multiple **spatial scales** from individual **districts or urban development zones** to **city-wide or intermunicipal levels**.

Client Benefits

Enhance your digital twin with BIM-CIM interoperability

Run and visualize ecological assessments in real time

Speed up decision-making and improve operational efficiency

Secure your investments through predictive analytics

Foster transparent collaboration and streamline teamwork

How does it work?

ThinkCities® assesses the **sustainability** of projects and sites using 60 standardized indicators across **6 key thematic areas**.

Urban planners, **local authorities**, public institutions, **site managers**, **CSR-driven companies**, **developers**, and **real estate stakeholders** can conduct a **comprehensive evaluation** of their programs, activities, or projects from **districts** and **urban blocks** to **CSR sites** and **municipal or intermunicipal areas**.

Each major indicator category is **scored** to provide a **real-time view** of ecological and energy performance.

Data processing enables the creation of **simple scores**, both by individual indicator and by category, on a scale from **0 (non-performing)** to **5 (high-performing)**. This allows for **relevant monitoring** toward decarbonization, at every stage of project progress or site maturity.

What makes ThinkCities® stand out?

An **evolving and interoperable tool**, compatible with your existing digital tools (**GIS, BIM, CIM**, etc.)

Indicators based on **recognized standards and certifications**: **BREEAM, LEED, Cit'ergie, ONB, Singapore Index, SDGs, LUCIE, EcoQuartier Label**, and more

Real-time data management and monitoring (processing, scoring, live display, etc.)

Coverage of multiple themes: **tertiary decree compliance, waste management, bike mobility, air quality, urban heat islands, smart lighting**, and more

A **complete onboarding and support service** to get started with the platform
