

Is AI worth it?

An independent, vendor-neutral diagnostic to test where AI adds value before committing to technology or implementation.

Fit 4 AI examines a portfolio of potential AI and data use cases, then turns the evidence into a detailed, costed action plan.

FROM OPPORTUNITY TO INVESTMENT CHOICE

INPUTS Business challenges / needs / ideas / candidate AI and data use cases

One assessment examines a portfolio and produces evidence-led choices for each use case.

AI is tested alongside analytics, rules, process redesign and conventional automation.

AI earns its place through evidence.

WHAT YOU RECEIVE

PRIORITY

A reasoned portfolio of the use cases worth pursuing.

PROOF

Value, feasibility, ROI, regulatory and delivery risk.

ROUTE

Actions, timing, people, skills, software, storage and costs.

You remain free to implement all, part or none of the roadmap.

WHY AGILA

INDEPENDENT + VENDOR-NEUTRAL

Operating reality + data and architecture + governed execution

Agila evaluates them as one system. The diagnostic is principal-led.

PUBLIC SUPPORT FOR THE DIAGNOSTIC

EUR 10,000–200,000 excl. VAT

Eligible diagnostic cost base

UP TO 50%

for SMEs

UP TO 30%

for large companies

Quick screen: registered office in Luxembourg; principal economic activity; valid business permit; eligible activity; financial health; and a specific AI or data-analysis expertise gap not available in-house.

Explore where AI could add value.

Start with a 30-minute opportunity and fit check.
