## GREENCELL DESCRIPTION, pioneer in Biotechnology

### History of the company

An innovative and independent French company, founded in 2000 by Mr. Jean-Yves Berthon.

### Technical data

25 years of expertise in biotechnology, over 800 microbial strains, 2 production sites

### Description of the structure

Our products are micro-organisms, natural alternatives to chemicals.

**Greenalvia range:** cultivating differently – biostimulation, biocontrol, and waste recovery.

**Mycoepur range:** preserving nature through the treatment of urban and industrial effluents, as well as lakes, etc.

### Main productions and complementary activities

Reference products for agriculture and the environment, expertise in fermentation, specialist in bio-sourced strain selection and production, with dynamic R&D focused on innovation.
