The current challenges in equipment and inventory management

Manual tracking:
errors and
wasted time

Lack of real-
time visibility

Insufficient
usage
traceability

Difficulty with
audits and
compliance
checks

Hidden costs
caused by
inefficient
management

Traceability has
become a
nightmare:
tools are too
complicated

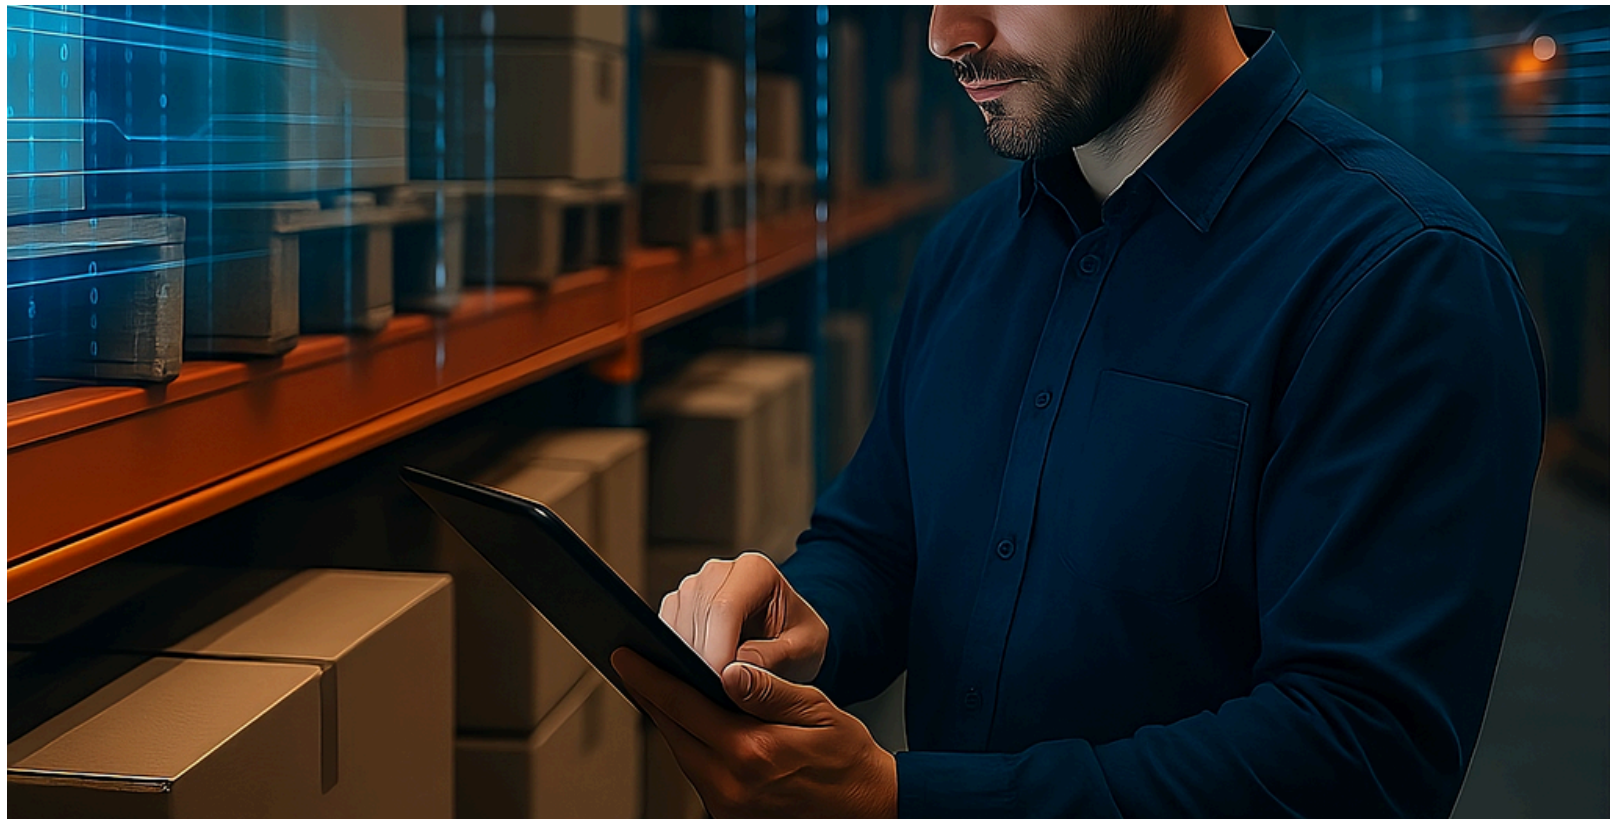

Next Gen Trace was designed to remove these constraints and simplify daily management.

Solution

Next Gen Trace finally unifies the management of equipment, consumables, and operations into one simple and intelligent tool. With NFC, RFID, and QR Code technologies combined with AI, everything becomes instant: location tracking, usage monitoring, and stock-out anticipation.

The Kanban dashboard provides a clear, real-time view of your equipment, movements, and interventions, with fully customizable alerts.

Quotes, invoices, complete traceability — the solution installs in just a few hours and works everywhere, on both PC and mobile.

Our key features

Usage logging

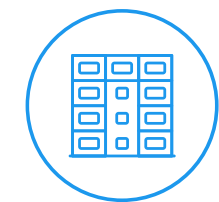

User-based traceability

Inventory

Kanban dashboard

Inventory management

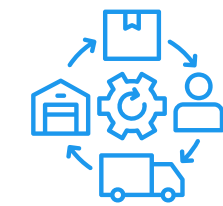

Client / patient / supplier records

Customizable alerts

Delivery and rental management

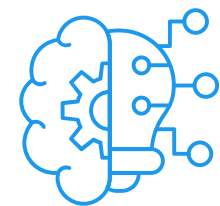

Sterilization

Quotes & invoicing

AI analysis
