

SEPARATION SOLUTIONS FOR FERTILIZER INDUSTRY

CANAL

SPARE PARTS ♦ MAINTENANCE ♦ LOGISTICS

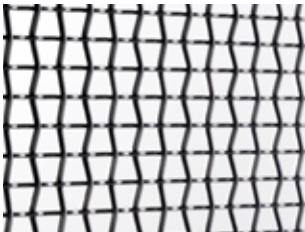

CANAL.

YOUR DEDICATED BUSINESS PARTNER FOR ALL SEPARATION TECHNIQUES USED IN THE FERTILIZER INDUSTRY.

Opting for **CANAL** is choosing for **technical knowledge**, **field experience** and **flexibility**. Since more than 25 years we are the preferred source for all kinds of separation techniques. Depending on your needs we supply industry standards or develop tailor made applications in the fields of filtration, screening and dewatering processes.

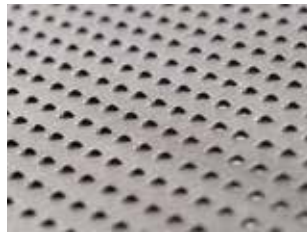

AN EXTENSIVE PRODUCT PORTFOLIO, FOR ALL FERTILIZER TYPES, FROM 1 SINGLE SOURCE.

PHOSPHATE BASED FERTILIZERS

Wire mesh for Converter

NITROGEN BASED FERTILIZERS

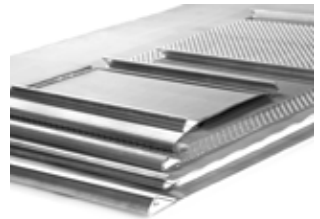

Perforated cheese grater plates for fluid bed

POTASSIUM BASED FERTILIZERS

Wedge wire for screen scroll centrifuge

CROSS USAGE

Vibrating screen for mining or granulation plant

Filter leaves for sulphur filtration

Mist eliminator

Wedge wire and polyurethane screening

Strainers and Bernoulli filters for water filtration

Perforated plates for vacuum filtration

Candle filters for ammonia filter

Edged screens with eyelets

Mist pad

As each production process differs, we can offer various metallic and synthetic filtration media such as wire mesh, perforated plates, knitted mesh and expanded metal.

The usage of a wide variety of metal fabrications as well as surface treatments of these media

guarantees a perfect fit for your business.

CANAL strives to be your reliable colleague in the workplace: engineering and developing customized separation techniques, from individual specific parts up to large series production, repair and maintenance included.

Would you like to receive more information about our solutions?

Do you experience specific requirements within your production process?

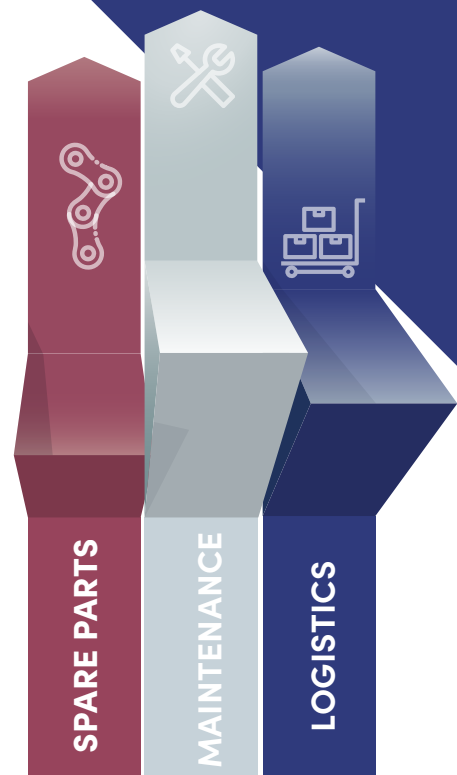

CANAL.

A LONG TERM PARTNERSHIP, UP FOR ANY CHALLENGE.

At **CANAL** we are convinced that our competences can boost your fertilizer business, assuring you to focus on your key processes. Instead of thinking in terms of “problems” and “products”, we like to talk about “challenges”, requesting custom made “solutions”.

As you need to stay in business and limit possible production downfall, **CANAL** offers a best in class aftersales organization, including available spare parts and rescreening (available at short notice), maintenance and flexible logistics.

Choosing for **CANAL** is choosing for a durable partnership.

WHAT WE DO BEST

- ✓ We can assist you with the development and/or the improvement of your separation media.
- ✓ Purchasing directly from the source assures you the best possible price-performance ratio.
- ✓ Worldwide, we are an excellent logistics provider for overseas shipments, able to transfer small quantities thanks to consignments from the Port of Antwerp.
- ✓ “Engineered in Belgium” and “Made in Germany”, our products are developed and manufactured according to the highest possible standards.
- ✓ We can rely on 25 years experience in the field, dealing with a wide array of industries (and applications).
