

Samples of our Realisations

Complete of a Secondary and Tertiary Processing Plant

ST BROLADRE quarry part of the GAGNERAUD 2018

The project includes :

- BONNET screening units (18sqm and 22sqm) mounted on hoppers
- A crushing station
- BONNET blending unit with a pylon-mounted stacker
- BONNET hoppers storage for loading dry or washed materials

Key Figures :

- Production capacity : 500 tons/day
- Storage capacity : 4 500 tons in hoppers
25 000 tons in ground stockpiles
- 1 200 tons of steel structures
- 170sqm of screening surface
- 750 meters of conveyors

Primary Crushing Station

**CHEMERE ROUANS quarry part of the COLAS Group
2019**

The project includes :

- A 300 cbm reception hopper
- A BONNET drawer feeder "DAT 6018"
- A BONNET Grizzly screen "CGB 4521-2" (10sqm screening area)
- A METSO C150 Crusher
- A network of 7 BONNET conveyors connecting the next primary station to the existing plant

Key Figures :

- Production capacity : 7 000 tons/day
- 400 tons of steel structures
- Over 600 meters of conveyor

Train Loading System

GUDMOND-VILLIERS quarry part of the CEMEX Group 2018

The project includes :

- A 65sqm BONNET reception hopper
- A BONNET belt extractor
- A BONNET transfer conveyor
- A BONNET loading station building by a bi-directional shuttle for precise wagon filling

Key Figures :

- Maximum throughput : 1000 tons/hours
- 150 tons of steel structures

BONNET Rotary Scrubbers

OCP LAAYOUNE quarry in Morocco, the World's Leading Phosphate Producer

The project includes :

- 2 BONNET 36x100 Scrubbers

Key Figures :

- Maximum throughput : 400 tons/hours
- Dimensions : 3,6m in diameter, 10m in length
- Processed materials : Phosphates
(particle size : 0,04 - 25mm)
