HISTORY

Fabric production has begun with the mills which have sizing, warping and weaving machinery in 12500 m² closed area in Denizli Industrial Area.

In order to meet the increasing customer demands, a new apparel facility was established in Dazkırı district of Afyon province.

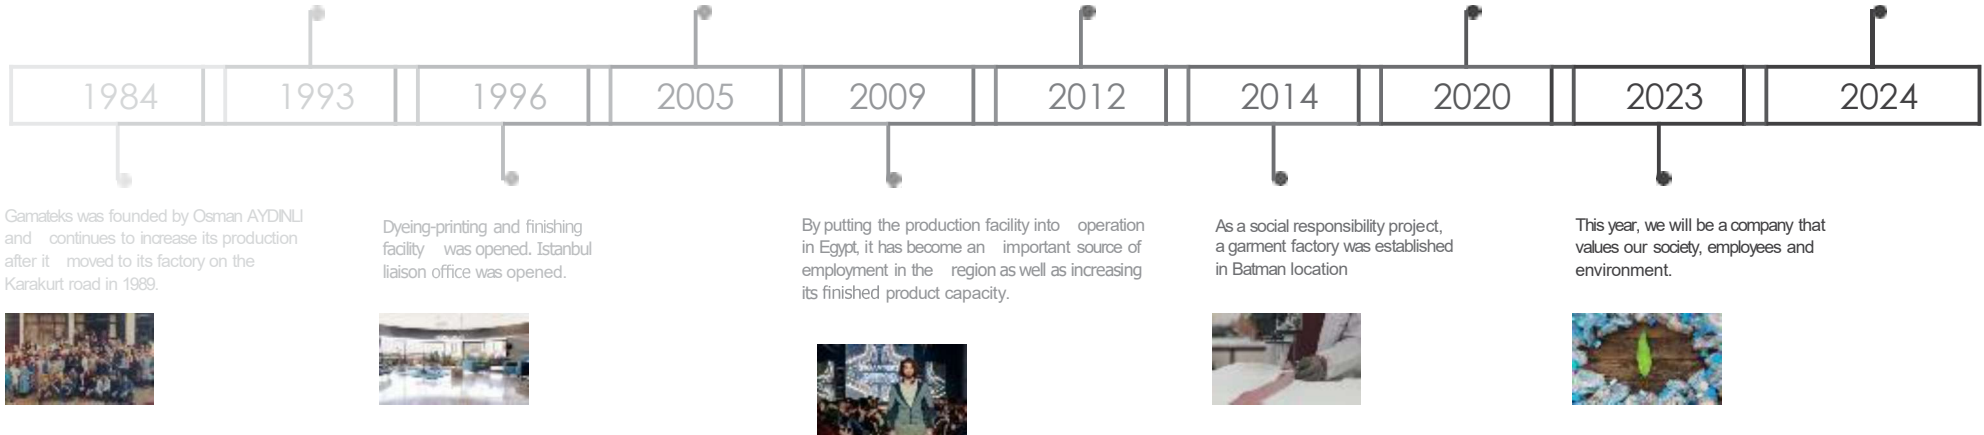

Gamateks® is the world's first and only environmentally friendly dyehouse it happened. Gamateks® ISO's Second 500 Largest Companies in Turkey ranked 1st with a turnover of 90 million.

We Implemented the Solar Energy System, which is a Sustainable and Clean Energy source, in our facilities.

We established Garment Wash Facility.

GAMATEKS

GAMATEKS EGYPT

GAMATEKS

Gamateks' manufacturing unit in Alexandria, Egypt, began operations in 2008 as a small-scale production facility.

The unit moved to a new location in the Public Freezone at the end of 2018, expanding to a total area of 10,000 square meters. Currently, it employs 910 workers, has a production capacity of 800,000 units per month with 21 sewing lines, and exports to well-known retailers in the USA and Europe.

A new investment plan is currently in progress within walking distance of the existing factory. The new facility will cover a total area of 12,500 square meters. Operations will begin in early September with an additional 10 sewing lines, increasing capacity over 1 million units per month. By mid-2025, the entire facility will be operational, achieving a total of 48 sewing lines and a monthly capacity of 1,750,000 units.
