

OPTIMA Moduline Smart
with integrated picker OPTIMA RPS

Increased flexibility for a shorter time-to-market

OPTIMA

Your benefits

Everything from a single source

- Central contact person and seamless integration into the management system

Reduced footprint

- Up to >50% savings compared to linear competition (in feeding)

Reduced time-to-market

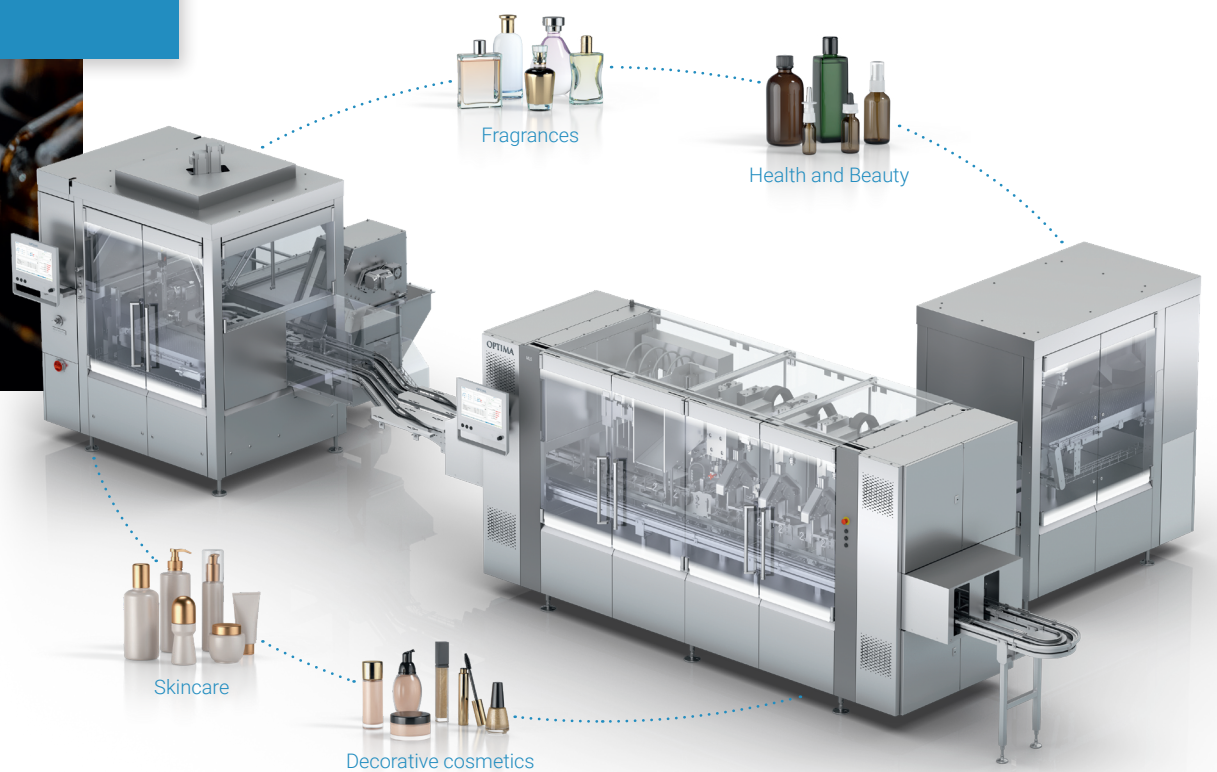

- Maximum flexibility in containers/closures, reduction of the format costs of the feeder by >50%, acceleration of the delivery time

Linear machine concept

- Reduction of format changeover time in the area of sorting by ~75%

Compact, fast, flexible: Integrated picker OPTIMA RPS for containers and closures

The integrated picker **OPTIMA RPS** for containers and closures adds another high-performance module to the OPTIMA Moduline Smart. Due to its increased flexibility, the OPTIMA RPS makes a decisive contribution to further reducing your time-to-market. In addition, you are well equipped for future requirements and unknown formats.
