

Octo+

By Frequentiel

Precision in every item. Intelligence at scale.

Octo+ connects your teams, systems, and products to track inventory accurately, simplify operations, and grow revenue.

Unlock the Full Value of Your Inventory

Octo+ by Frequentiel transforms physical flows into real-time operational intelligence.

By seamlessly integrating RFID, barcode, and IoT technologies, Octo+ empowers retailers to eliminate stockouts, master omnichannel fulfillment, and reduce shrink, turning inventory accuracy into a powerful engine for revenue growth.

What Makes Octo+ Unique

RFID + Barcode Tech Enabled

Octo+ allows you to use RFID, Barcode, or a combination of both in a single SaaS solution. Manage products at SKU and item serialization (RFID/EPC) level.

Fast to Implement. Easy to Adopt.

Connect your PoS and ERP systems for a 360° real-time view of your inventory and faster transactions. The intuitive app ensures easy adoption across your business.

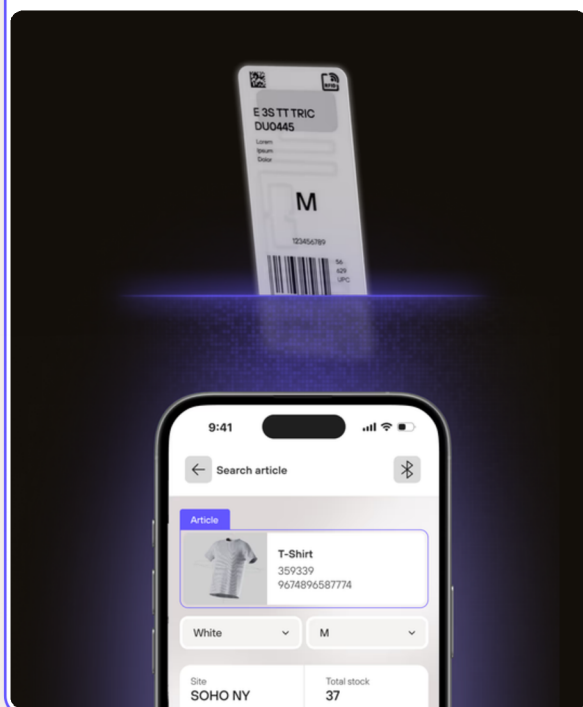

Rapid Value Creation

Launch result-focused inventory strategies within weeks. Streamline your processes and achieve new levels of accuracy, efficiency, and cost-savings.

Octo+

One App For All Your Inventory Needs

- ✓ Inventory management and product location
- ✓ Real-time, item-level accuracy
- ✓ Optimized supply chain and logistics
- ✓ Connected omnichannel flows
- ✓ Fraud and loss prevention
- ✓ Traceability and product digital twins
