

CONNECTED PILL ORGANIZER

The pill organizer that alerts you when a dose is missed.

PillQare tells you which capsule to take. If the dose isn't confirmed, the loved one of your choice is notified – even from afar.

FROM

€69 NO SUBSCRIPTION

pillqare.com

You can't always be there.

A missed call, a busy day, a few miles away... PillQare helps you stay connected without watching over them all the time.

RECOMMENDED

Standard pill box

NOT CONNECTED

- ✗ No reminder if a dose is missed
- ✗ Several daily doses, less reliable
- ✗ No remote follow-up
- ✗ Risk of double dosing

VS

PillQare

CONNECTED PILL ORGANIZER

- ✓ Alerts at dose time
- ✓ The right capsule, made easy
- ✓ Real-time remote follow-up
- ✓ Peace of mind for everyone

You're notified only when action is needed.

HOW IT WORKS

21

NUMBERED
CAPSULES

10

MEDICATIONS
PER CAPSULE

1

CAPSULE
= ONE DOSE

One capsule. One number. One moment.

Each capsule is one dose. You fill them in advance using the guide sheets, then the app simply shows the number to take — nothing to search for, nothing to sort.

CHOOSE THE LAYOUT THAT MATCHES YOUR DAILY DOSES

1 dose a day

Lasts 21 days

2 doses a day

Lasts 10 days

3 doses a day

Lasts 7 days

Three simple steps.

Easy to prepare, easy to follow
— for them and for you.

1

Fill the capsules

Place the medications in each capsule following the guide sheet.

2

Set the schedule

Enter dose times in the app.
PillQare takes care of the reminders.

3

Take the number shown

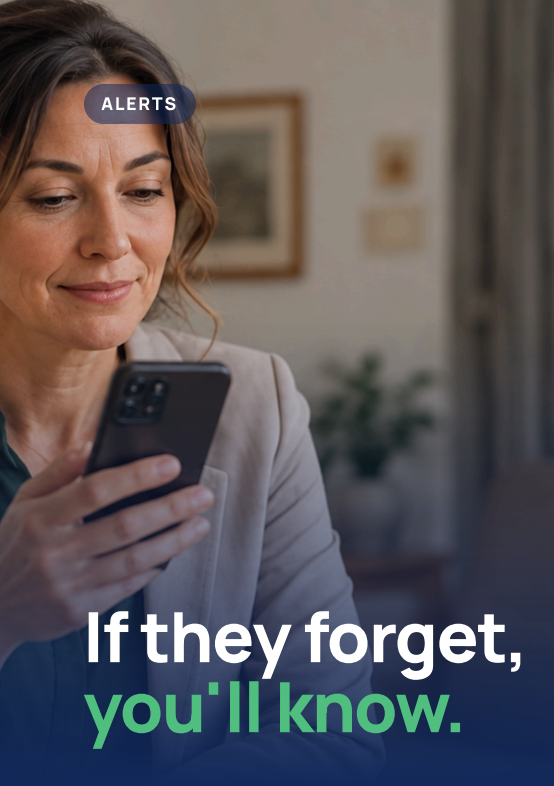

At the scheduled time, the app shows which capsule to take.
One tap, and it's confirmed.

Simple for them.
Reassuring for you.

The patient keeps their habits and independence. Loved ones get useful visibility, without being intrusive.

APP INCLUDED

NO SUBSCRIPTION

If they forget,
you'll know.

Reminder sent

At the scheduled time, the app shows which capsule to take.

Dose not confirmed

The time window has passed with no confirmation.

Loved one alerted

The person of your choice is notified. You know, without having to ask.

You're notified only
when action is needed.

Alerts are based on dose confirmation in the app. Loved ones get useful visibility, without being intrusive.

OPTIONAL

Want to go one step further?

Add the connected dispenser: it releases the right capsule itself, at the scheduled time, and secures every dose.

Automatic dispensing

The right capsule drops into the cup at the scheduled time.

Light signals

A green, orange or red ring says it all at a glance.

Double check

Every capsule inserted and every dose taken is verified.

Family alerts

Notification, SMS and a call from Lisa if a dose is missed.

Same app, same schedule, same capsules.

Green, orange, red: it watches in real time.

No need to open the app. The colour of the ring says it all, from across the room, in a second.

14:00

On time

The light turns green: the capsule is released and the dose is confirmed.

14:10

Late

No confirmation within the time window: a notification and an SMS go out to loved ones.

14:30

Missed

Lisa can call the patient and the main contact is alerted. The capsule stays locked: no double dosing.

If a dose is missed, the capsule stays locked in the dispenser: no stacking, less risk of error or overdose.

Two options. One ecosystem.

Start simple. Upgrade whenever you need to.

The pill organizer

You prepare. PillQare reminds you.
