

Cognivance

Put your professional skills
to work to **conquer** your
markets

19.3 billion euros*

Losses associated with skills attrition in French industries by 2030

What about current solutions?

Example for an industrial SME with 50 employees

The various forms of apprenticeship remain an important mean of industrial training

Traditional training	> 100 000€ yearly (training costs + productivity impact)
Mentoring	+10h/week/expert
Average time to become proficient	6 to 9 months

Industry expectations for 2025*

Capitalize on skills

Train faster

Free up production

Make it accessible to as many people as possible

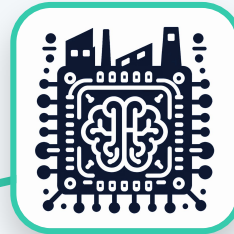

Our customers accelerate their production with the only global AI system specialized in industrial activity analysis

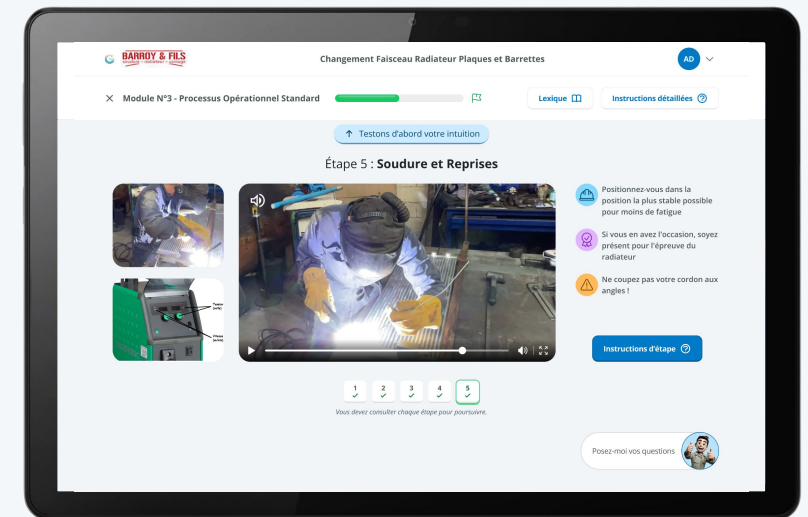

Skills acquisition

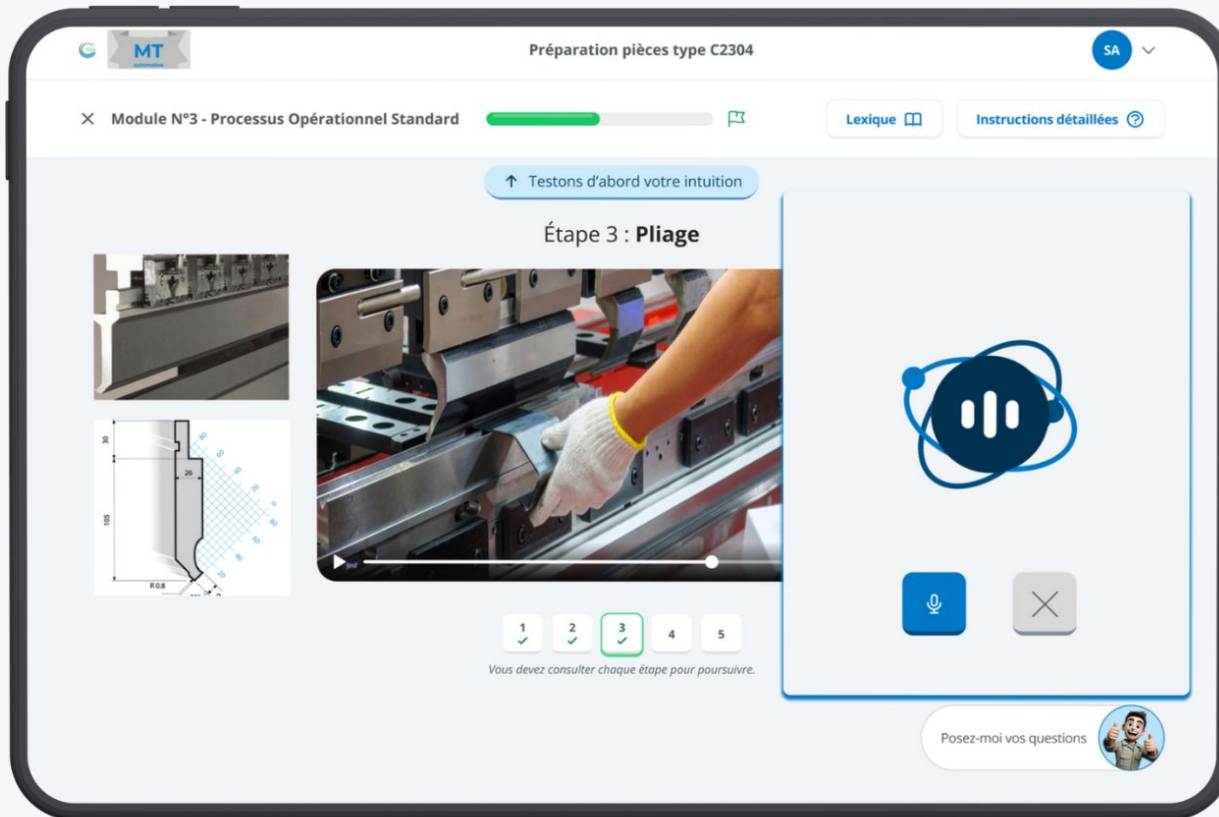

**Automated analysis
and generation**

Internal transmission

Reduce errors and accidents with engaging, user-friendly instructions

+25% quality gained

Embedded training engineering

Your teams understand, apply, and retain.

Multilingual system

Deploy training courses in multiple languages without recreating content.

Personalized vocal assistant

CoGeo provides the right answers at the right time, taking into account users' personal expectations.

Save valuable hours of support time by automatically generating reliable, personalized content.

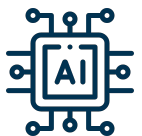

100% assisted

Each step is guided, so you can stay focused on what matters most.

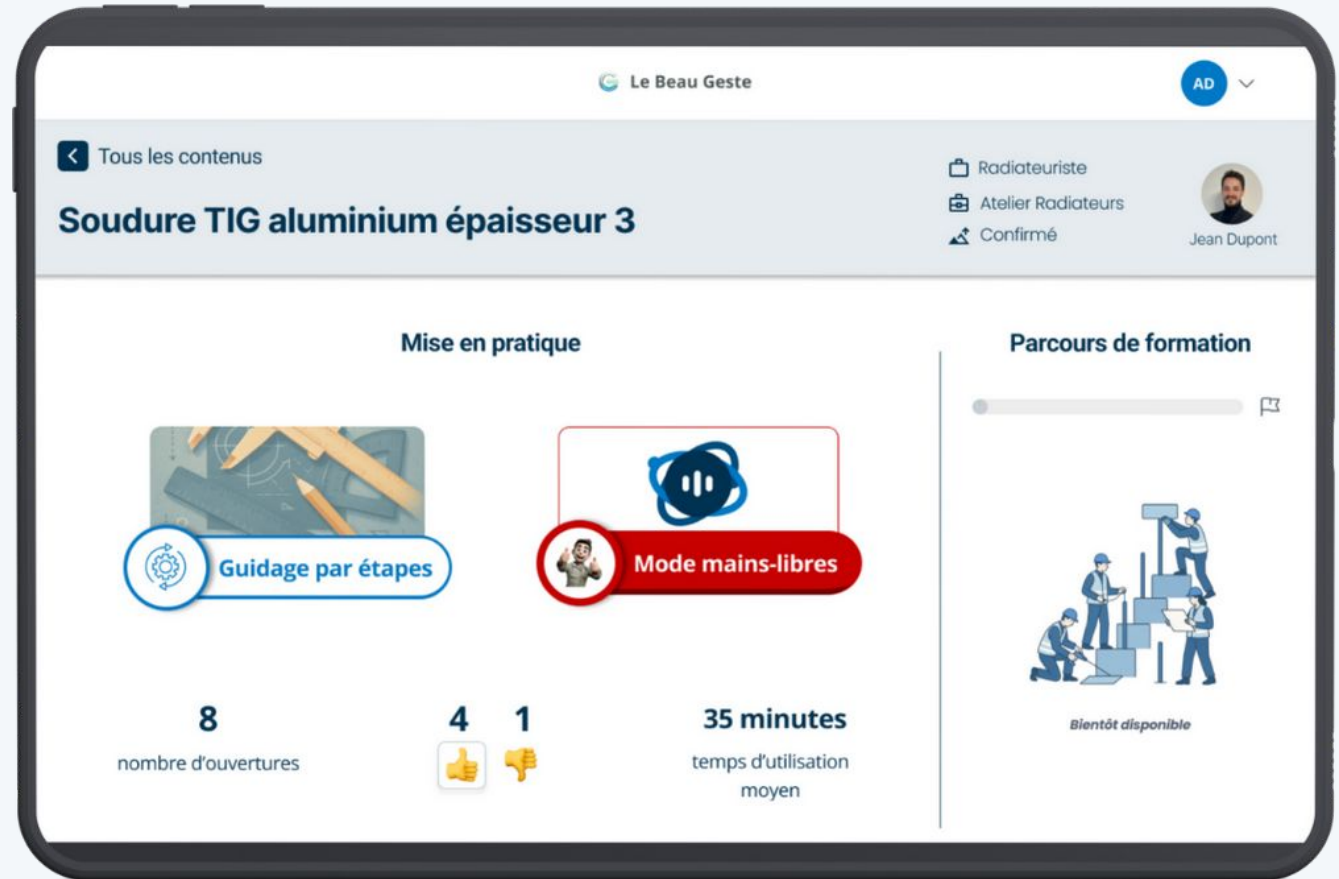

No Skills required

No more overly complex tools, thanks to our structured and guided process.

AI system that structures and animates

Our CoGeo® AI organizes your content, identifies key points, and suggests feedback.

+50% productive hours

Capitalize on your skills by decoding the most intuitive field practices of your experts.

Specialized **AI voice agent**

Suitable for field teams and easy to adopt.

Video analysis and transcripts

Skills are analyzed in detail for personalized and reliable feedback.

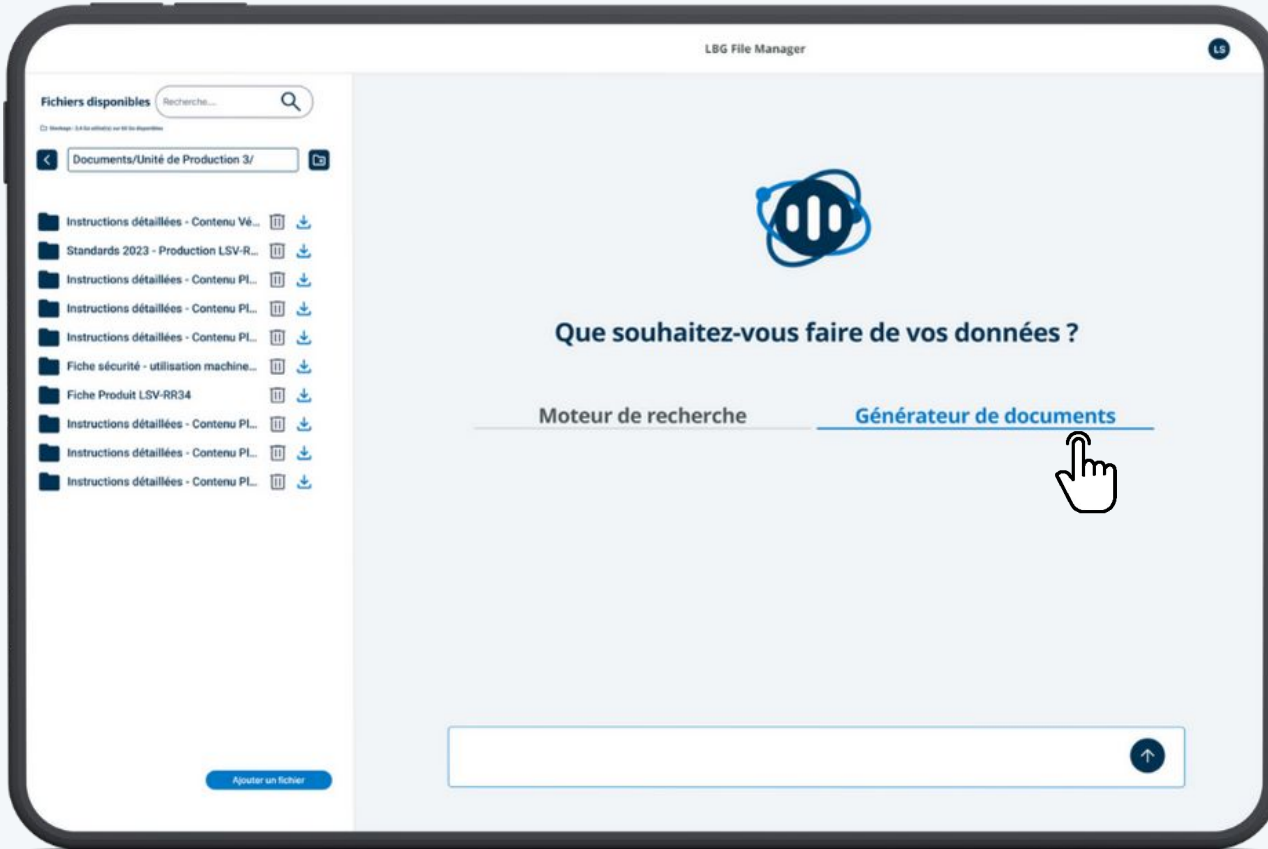

Your data: your **active capital**

Your data is secure and becomes your intellectual property.

-35% training time

Improve your processes and methods by leveraging your new field data

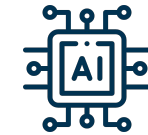

Capitalize and innovate with next-generation assets

Your skills database

Import your reference documents to the same location as your field content.

Your data from a new perspective
