ENSURE WORKERS ARE SAFE AND SUCCESSFUL

Provide real-time situational insights to enhance worker operations and guarantee better decision-making by their supervisors

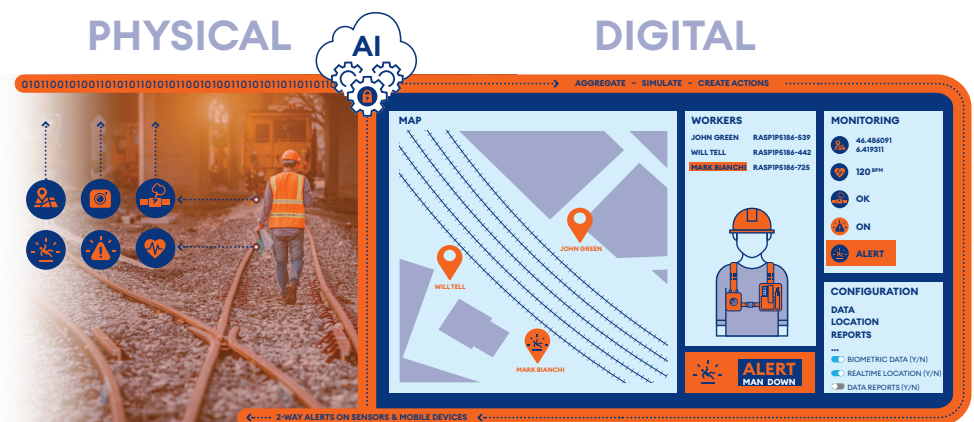

We improve the safety of workers in hazardous work environments and significantly reduce response time during incidents by providing **timely, reliable and automatic alerts** to safety personnel.

Our product has been thoroughly engineered **based on field feedback** from users in various industries worldwide. We understand that user adoption and effective utilization are essential to build trust and achieve success.

The Wearin' solution **detects and alerts to prevalent rail hazards** such as falls, thermal stress and environmental dangerous gases.

We integrate external devices and sensors to collect real-time data from the field in order to have a better understanding of the workers' situation.

“ **This smart IoT technology has the potential to transform the way workers operate in dangerous environments.** ”

1. Modular hardware platform with integrated sensors to be worn by workers
2. Live data transmission to the digital platform compliant with state-of-the-art data security policies
3. Evolutive AI-powered platform generating alarms and notifications to improve safety and efficiency
4. Web-based dashboard for remote monitoring, coordination and decision-making

LOCALIZATION

Quick acquisition of workers' coordinates and exact location in case of incidents during their operations

SOS BUTTON

Ergonomically designed for easy access while ensuring the prevention of false alerts

REMOTE ASSISTANCE

Easy integration with existing Control Centers and efficient tools for on-call personnel and team managers

HSE SUPPORT TOOL

Comprehensive reports to assist with the demanding tasks of supervising the usage of the solution and improving internal processes

EASE OF USE

Lightweight, hands-free device, easy to carry and with a minimum of 10 hours of battery autonomy

FIELD READY

Ruggedized and waterproof (IP67)

MODULAR, INTEGRATED SENSORS

Leverage fully modular IoT technology and AI algorithms to offer a revolutionary solution for greater protection and productivity in the railway sector

MODULAR

Unique solution that meets the needs of various teams by providing tailored functionalities.

RELIABLE & EFFECTIVE

Successfully field-tested solution in multiple industries.

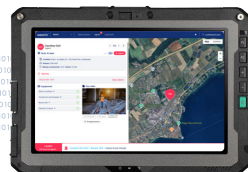

INTUITIVE & COMPACT

Hands-free all-in-one device avoiding distractions.

EVOLUTIVE PLATFORM

WEARIN' DASHBOARD
