

Who we are

AMA is a French technology company that develops assisted reality and intelligent monitoring solutions for **field environments**.

With offices in Rennes (France, HQ), Raleigh (USA), Cologne (Germany), and Tokyo (Japan), AMA provides support that's accessible anywhere, anytime.

ISO 27001 certified and B Corp certified, AMA combines performance, security, and positive impact to deliver responsible and purposeful tech for the field.

XpertEye

XpertEye is a secure, AI-powered collaborative platform designed to capture and share field expertise in real time.

Multisource, XpertEye is accessible via smartphone, tablet, smart glasses, PC, UVC camera, and more.

Includes key features :

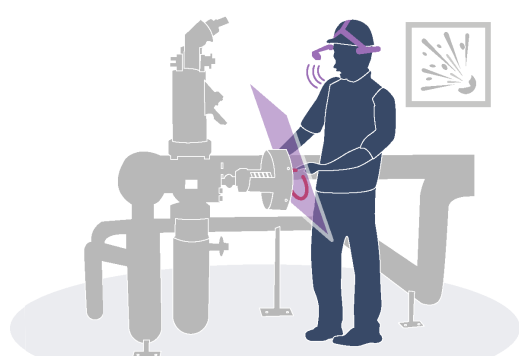

Messaging

Secure video calls

Shared Vision

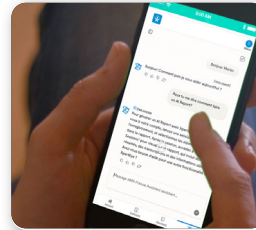

Advanced features powered by artificial intelligence:

Live Translation

Instant translation of conversations during calls, with no language barrier.

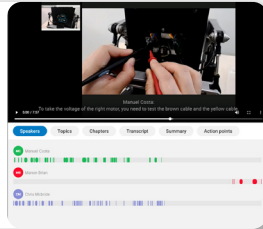

AI Agent :

Merlin is an AI agent designed to instantly assist field technicians.

AI Report

Automatic summary of conversations, actions, and media at the end of each session.

Autofill

Pre-filled forms generated from collected data or standardized documents.

Full Body Anonymization

Automatic full-body anonymization to ensure confidentiality and protect individuals' identities, while preserving all surrounding information and context during remote support sessions..

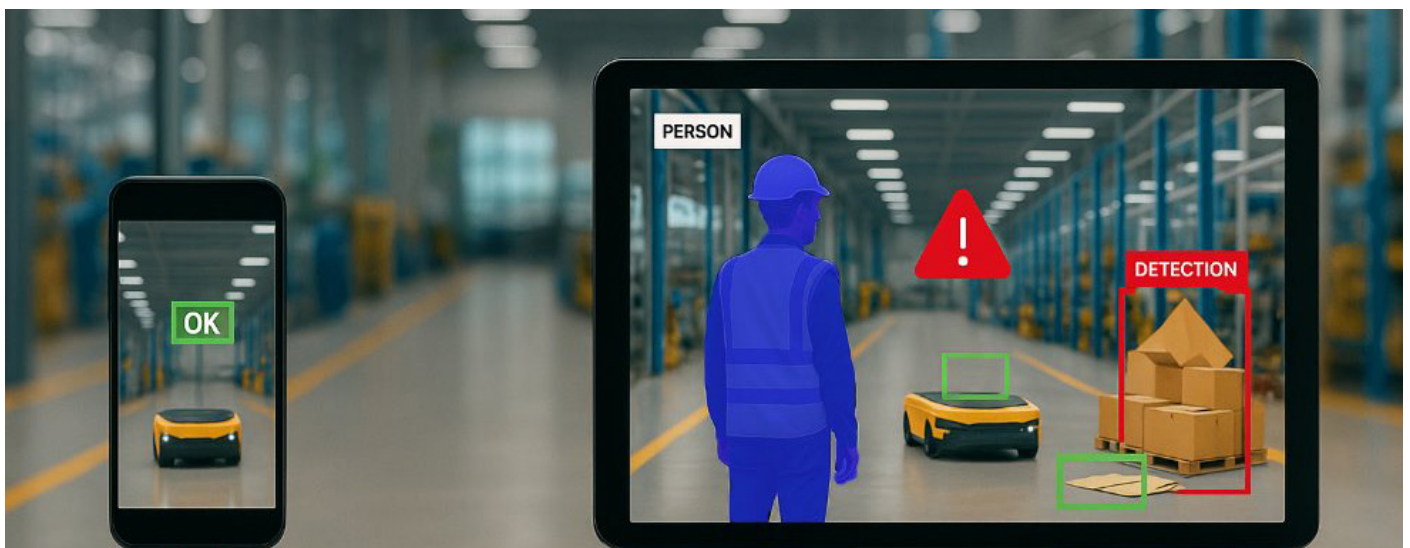

XpertEye and the Monitoring Station

«Observe without surveilling, analyze without identifying.»

The Monitoring Station is lightweight and easy to install. Multi-source by design, it analyzes behaviors in real time. Recordings are event-triggered, using custom triggers to capture only relevant data.

The Monitoring Stations and XpertEye work together through integrated AI.

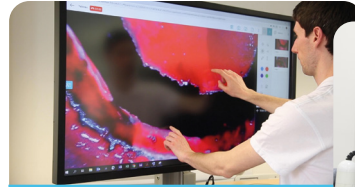

Computer vision detects field events and automatically triggers XpertEye sessions when needed. They also benefit from AI features such as Full Body Blur for GDPR compliance, with additional functions available on demand.
